or used without prior written consent from the Operating Manager of BAASS®.~~

PREFACE

This Progress report summarizes BAASS activities and progress for the period June 1-June 30, 2009.

TABLE OF CONTENTS

Topics covered in this report are the following:

Progress on Recruiting Staff.....	Page 3
Progress on New BAASS Facilities.....	Page 6
Progress on EarthTech Contract to Deliver 24-30 papers.....	Page 8
Summary of MUFON Investigative Activity for June 2009.....	Page 11
BAASS Deployment to Brazil.....	Page 97
Project Northern Tier Update.....	Page 116
BAASS Continues Study of the Information on UAP Activity Released by the British, Canadian, French and Danish Governments.....	Page 129
Conclusion.....	Page 131

Progress on Staff Recruitment

- Between June 1-30, 2009 in response to job advertisements in multiple on-line locations, BAASS received a total of 461 resumes.
- The first level of screening (removal of applications on the basis of too frequent job changes, those obviously inexperienced to work at BAASS, non-US citizens etc) was conducted on all resumes.
- Between three and four dozen phone and face-to-face interviews were conducted during the month of June.
- As a result of intensive interviewing and the transfer of some engineers from Bigelow Aerospace to BAASS, as of June 30, 2009 BAASS has forty five full time employees and six part time employees in addition to the administrator (see table on page 3 below). Fulltime BAASS employees now include senior investigative personnel (backgrounds in law enforcement and AFOSI), engineers (specializing in electrical, software and astronautics), scientists (with expertise in physics and biology) as well as support personnel and security guards.

We are optimistic that in the next month we can hire the first year's full complement of staff (approximately 50-60 personnel to begin the 2nd year) that will make BAASS the most maximally productive organization in this field. However, this will give BAASS a foundational base that will partially cover the investigative and analytical needs within the United States.

Progress on New BAASS Facilities

During the month of June AAP Person 4 the BAASS administrator, made substantial progress on two major real estate projects in line with anticipated future BAASS needs.

(1) Underground Vault: The need for a highly secure underground vault operated by BAASS became apparent in line with a BAASS priority to pursue and acquire recovered hardware and biological samples from the corporate world and/or from private individuals and groups located elsewhere, including in Brazil. It was recognized by the BAASS administrator that there was no highly secure facility at BAASS to store exotic material or tissue that the organization could obtain. Accordingly, the BAASS administrator designed an underground facility to be located in North Las Vegas at the Bigelow Aerospace facility. The chosen location is exceptionally well protected by perimeter fencing and razor wire, surveillance cameras and 24 hour armed guards who are retired or current military. Further, the BAASS administrator during the month of June designed and created architectural plans for a 5000 sq.ft underground vault with 3 foot thick walls, ceiling and floor with a concrete access tunnel leading to multiple security doors, at least one of which comprises a thick vault steel door. The entire facility will be located underground at the Bigelow Aerospace facility with over 15-20 feet of earth above the structure. Any surface structures protruding from the ground will be extensively camouflaged. It is anticipated that subject to building permits, the new underground facility will be capable of being occupied by late 2009 or early 2010. More details on this project will be reported in the June 2009 BAASS monthly report.

(2) New Buildings Purchased for BAASS: Because of the extremely rapid pace of BAASS personnel expansion (see previous section), the

organization is close to outgrowing the current BAASS facility. Accordingly, the BAASS administrator began planning for this eventuality late last year (2008) and in the past several months has personally visited and inspected close to fifty separate buildings for sale located in different areas of the Las Vegas Valley with a view to purchasing a new facility for the rapidly expanding organization. This lengthy, time consuming process culminated in the purchase of five new office buildings which will be customized for BAASS personnel use. As of June 31, 2009 these five buildings are now in escrow. It is intended that the buildings will include a 5000 sq ft laboratory and secure physical evidence storage facility and a second building will contain a secure conference room (SCIF) and adjacent office space for multiple personnel. These new buildings should be capable of being occupied by BAASS personnel by the end of 2009.

Progress by Earthtech on Production of 24-30 Position Papers on Physics of Advanced Aerospace Vehicles

On December 31, 2008 BAASS awarded a contract to Earthtech International [AAP Person 57] to deliver 24-30 position papers that will be based on expanding and focusing on strategically important sub-projects from the 12 position papers previously delivered by the subcontractor on twelve (12) technical areas: 1.) Lift, 2.) Propulsion, 3.) Control, 4.) Power Generation, 5.) Spatial/Temporal Translation, 6.) Materials, 7.) Configuration/Structure, 8.) Signature Reduction (optical, infrared, radiofrequency, acoustic), 9.) Human Interface, 10.) Human Effects, 11.) Armament (RF and DEW), 12.) Other peripheral areas in support of (1-11).

According to an update from [AAP Person 57] progress is being made. Delivery of all 24-30 papers is scheduled for July 2009. Several drafts and even final papers have been already received by [] and are in various stages of [] being scrutinized. The following is an update from [] on the individual contributors and the titles of their reports as of the end of June 2009. As of the end of June 2009, Earthtech have taken delivery of approximately 24 papers.

BAASS has Contracted to Purchase Information on UAPs from MUFON

In February 2009, BAASS executed a Purchase order with MUFON that entitles BAASS to: (a) receive notification of significant reports on UAP sightings from anywhere in the United States within hours, (b) receive timely reports from MUFON investigators regarding investigations of these incidents (c) receive physical evidence (including photographs, digital recordings, samples of soil, insects, plants, and animals) for scientific analysis. BAASS has multiple laboratories that are ready to conduct forensic, photographic, metallurgic, chemical, isotope, biological, chemical analysis of any specimens that BAASS receives from MUFON.

BAASS has already hired a team of high quality top investigators with extensive intelligence and law enforcement investigative experience. These investigators are currently located in Las Vegas and are trained to deploy as "special forces" rapid reaction investigative teams that are deployable anywhere in the United States if BAASS determines that high value UAP cases warrant additional investigations. However this investigative group is still too small to cover the geographic area needed in both the United States and overseas.

Throughout the months of March through June, it became apparent that the number of cases that MUFON was providing BAASS was significantly lower than first agreed at the beginning of the purchase agreement contract. At the same time, it became apparent that MUFON was only spending about 50% of their allotted stipend per month. Accordingly, at the end of June 2009, AAP Person 4 proposed to reduce MUFON's monthly stipend by 50% while encouraging the organization to begin to use the money that remained unspent to make up the difference. BAASS proposed, as per the purchase agreement, that there would be a further review of MUFON's performance by the end of October 2009.

AAP Person 105 penned the following reply addressed to AAP Person 4 on June 29, 2009. The following is the text of the letter from MUFON to BAASS

Mutual UFO Network, Inc.

1843(a)(2)

June 29, 2009

BAASS

AAP Person 4

Dear

AAP Person 4

We are in receipt of your letter dated June 25, 2009 regarding the Purchase Agreement Contract and suggested changes.

Let me begin by saying that we at MUFON are very pleased with the positive changes we have been able to implement as a result of our agreement. More importantly because of the dedication of our two organizations we now, for the first time, have a defined and repeatable process for quickly analyzing new cases, triaging them to determine their level of importance, and quickly responding to key cases within hours of being reported. This is a HUGE step forward for Ufology

and would not have happened without BAASS and MUFON working together towards a common goal of rapid response.

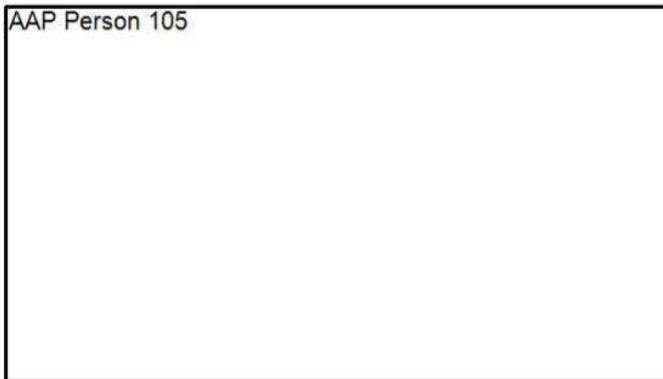

In regards to your suggestion to move funding to a mid-term level, we certainly understand your rationale for wanting to do so. Please understand that as we aggressively pursue other avenues of finding, and attracting, new cases that our support and deployment costs will rise accordingly. Four months is a very short timeframe to measure incident and expense results considering we were at ground zero just four months ago.

MUFON accepts the reduction in payments for the next four months with supplemental monies to come from the initial funds allocated from February to June 2009. We hope that BAASS can reevaluate our monthly allocation in October 2009 based on the expected increase in expenses not only resulting from recent changes to deployment criteria but also to increased MUFON public exposure.

Again, we are pleased to be providing services to BAASS and working together to solve the UFO mystery. Our goal at MUFON is to make this a mutually beneficial relationship for many years to come.

Sincerely,

AAP Person 105

June 25, 2009

Dear AAP Person
105

This letter is to address the status of the MUFON Purchase Agreement contract that was executed between BAASS and MUFON in February 2009.

Firstly, we are pleased to see that MUFON is moving ahead with plans to execute contracts with TV and other media as a means of raising its national profile.

With regard to BAASS's viewpoint on MUFON's performance to date, Section 7.0 of the purchase agreement defines three alternative scenarios based on this June performance review:

- 1.1 Immediate termination effective June 30, 2009, of the contract for Seller's failure to provide the quality and quantity of information to the satisfaction of Buyer.
- 1.2 Continuation of the Agreement under the same terms and conditions as agreed.
- 1.3 Continuation of the Agreement with a merit-based increase in price for the Product.

There are two aspects that have emerged from MUFON's monthly reports that have caused BAASS significant concern. They are:

- (1) We note that for the month of February/March, MUFON spent \$11,014.37 out of \$74,666.67 allocated; in April, MUFON spent \$23,803.95 out of \$56,000 allocated; and in May, MUFON spent \$23,812.00 out of \$51,000 allocated. Therefore, it appears that BAASS is sending excessive sums to MUFON on a monthly basis.
- (2) We feel that MUFON's productivity does not match the monthly contract award. As of mid-to late June, BAASS has not received adequate number of cases to justify spending \$51,000 per month, nor has MUFON ramped up its hiring rate to accommodate the monthly \$51,000 stipend as evidenced by the fact that the monthly expenditures by

1843(a)(2)

MUFON from April and May 2009 have reached a plateau at \$23,803.95 and \$23,812.00 respectively.

For these reasons, we propose a Phase II funding level between July 1 and October 31, 2009 of \$25,500 per month. This sum, when added to the unspent MUFON allocations (estimated at approximately \$120,000 for February/March, April and May 2009) should be more than sufficient to almost double MUFON's present horsepower.

Regardless of the above, we believe that the accumulation of large sums of unspent money was not in the spirit of the BAASS-MUFON purchase agreement.

It may be argued that MUFON has taken some time to ramp up to the present levels and hence could not spend the allocated money. In response we propose that from July 1-October 31, if MUFON combines the monthly stipend (\$25,500) with a monthly portion of the unspent BAASS money, then a net monthly sum of approximately \$55,000 is available for MUFON's operations. We believe that this mechanism will be adequate for MUFON to expand to a higher level of performance between July 1 and October 31, 2009.

By October 27, 2009, we will have another opportunity to examine the monthly contract award in light of MUFON's progress in expanding its organizational productivity.

Sincerely

AAP Person 4

Administrator, BAASS

1843(a)(2)

SUMMARY AND INVESTIGATIVE REPORTS FROM MUFON FOR MAY and JUNE 2009

As requested, the following cases are investigative summaries from MUFON of cases for which they deployed SIP team members during May and June 2009.

Case # 16421

AAP Person 109

GPS Coordinates:

1843(a)(3)

Location : Scammon, Kansas CAT 2 Deployment

Date of Event: 4-04-2009

On April 7, 2009 a STAR team **CAT 2 Deployment** was activated on this case. STAR team Investigator AAP Person 109 was assigned as lead investigator.

AAP Person 59

**MUFON (Mutual UFO Network)
STAR Team Coordinator / Manager**

AAP Person 59

INVESTIGATOR REPORT: 04/07/09 *** case #16421**

10:00 am I visited the witness ***** and her 17 year old son, *****. We met at

*****'s place of employment in Pittsburg KS, which is a

1843(a)(2)

1843(a)(2)

After brief introductions, I asked ***** and her son to describe what they saw. They drew sketches describing the size and shape of the craft. ***** and ***** chose to draw their description using the same sheet of paper. ***** also showed me the picture she had taken of the craft with her

"Razzor" cell phone. 10:30 am I followed ***** and ***** out to the sight of the encounter.

We drove from Pittsburg, Kansas to Scammon where they live, and the sighting occurred. Scammon is about 10 miles down Hwy 160. We decided that the best way to re-enact the night of the sighting was for me to enter their vehicle sitting in the front seat and have ***** drive, taking the same route as that night. ***** sat in the back seat. While I video taped,

***** drove as they both described the craft, where they saw it, and it's placement in the sky and over the trees. They described the craft as being as large as a small house hovering over the tree tops about 200 feet in the air. I asked them to describe the size by their arm at length showing my fist as a size comparison, and they said bigger. I spread my fingers, and they said bigger, more the size of both of my hands side by side. The color was an orange light undefined. ***** said it looked like the center was dark, and the light was coming from a tube light surrounding the craft. ***** didn't see that from her angle, but saw one large round/oval odd shape indescribable light with what looked like an army net attached above it. It made no sound, had no smell, they followed the craft with their car and there was no electromagnetic effects. There were dogs barking, but they claimed that there are a lot of dogs in the area and that they bark all the time. I asked them what made them notice the object?

They were out at 1:23 in the morning looking for *****'s missing 14 year old son. He ended up being at the *****'s residence who is a neighbor down the street a couple of blocks away. The boys were in the basement working on a car. Both boys were thought to be missing. What made ***** look in the direction they did was the train. A Burlington Northern freight train passes through the edge of town quite frequently. There are 3 intersections so as it passes them, the train blows its whistle in 3 separate bursts. That night there was one long whistle burst. They thought the kids might be in trouble on the tracks so with hearts beating fast they headed that way. That is when they spotted the large craft hovering at the end of the street.

As they drove towards it, the craft moved about 1 mile an hour to the left, and as they approached closer, it shot off / backwards out of sight. They described the craft as being as big as a small house, hovering 200 feet over the tree tops, and only about 4 to 5 blocks away. ***** was afraid that her missing son may be aboard the craft because he wasn't answering his

phone. They decided to drive home and retrieve *****'s phone to see if the younger son would answer a call from his older brother. When ***** came out of the house, he noticed that the craft was back. This time he said "mom let's chase it!" They raced towards it and found it at the end of the street.

1843(a)(2) They were at [1843(a)(2)] and it was 5 blocks down dead center at the end of [1843(a)(2)] As they slowly moved forward, it moved slowly to the left behind some trees. They drove faster to get a better look and it was gone.

***** and ***** pointed out the houses where the possible other witnesses lived. The first was ***** ***** , the father of the other missing boy. They didn't think he saw anything but showed me his house which had a green van parked in front. The other witness was ***** ***** Sr., grandfather of the other missing boy. ***** ***** Sr. had claimed to have seen a Chinese lantern in the distance, float by his window while he was in bed.

The elder *****s live at [1843(a)(2)]

11:00-11:30 am I re-entered my jeep and followed the witnesses to a small neighborhood park where we did an on-camera interview.

12:00 pm ***** had to get back to work, so she left her son with me. I promised to

deliver him safely back to her at her work place when we were done. This was totally her idea, and made me a little nervous. ***** was to take me to the field where they thought the craft had hovered over. This was the same field where a craft had been seen on the ground by ***** 3 months before. The teen and I tried several entry access points but were blocked first by a no trespassing sign, and further down by a creek. There was access from the road between cut trees, but not without permission which I would get tomorrow.

12:30 pm I decided it was time to take the teen back to his mother's place of employment.

1:30 pm As I walked ***** in, I was met by ***** , a witness of prior area

and Joplin Missouri sightings. I videotaped [1843(a)(2)] description of past events and experiences.

2:25 pm I thanked ***** , ***** , and [1843(a)(2)] and then I left.

2:30 pm I decided to visit the Crawford County Sheriff's department where I was told

the dispatched officer on scene was from.

3:30 pm I left the sheriff's department to head for the actual Sheriff's Department where

the dispatch came from, Cherokee county. There was some confusion by the locals as to what Sheriff Department had jurisdiction over the town of Scammon.

4:30 pm I arrived at the Cherokee Co. sheriff's department. I had to ring in for access,

explaining to the dispatcher that I was there to check on information concerning a

dispatched officer to Scammon on April 4th or 5th at 1:00 - 2:00 am. I was given entry

and asked to wait at the window in plain view of the dispatcher.

5:00 pm I met with and spoke to a retired county sheriff *****who lived in Scammon. He didn't hear or see anything either night. I received the following info from him:

- No nearby military bases
- An army ammo plant is located in Parsons 10-15 miles away.
- HM Plant formally Slurry, is in the area. During 9/11, there were military soldiers and police surrounding its perimeter guarding it. There was 11 million lbs of high grade explosives stored there; which was rocket fuel. It has since been renamed HM Plant and downgraded in size of inventory.
- Cherokee County pays no oil or gas taxes.
- The area has the largest coal shovel in existence standing 760 ft high.
- The train traveling through Scammon was a Burlington/Northern Santa
- Heart of the Heartland Railroad Museum is nearby.
- This area is the home of Deep Shaft Whiskey.

5:50 PM: I was finally able to speak to the Police dispatcher *. She wasn't clear about whether or not a police officer was dispatched to Scammon that night. I next spoke to Sheriff *****who first told me that it was fireworks seen that night, and when I said "fireworks", he said well actually it was a guy who set off 3 Chinese

lanterns. I asked the sheriff the name of the individual who told him it was Chinese lanterns and the name of the person that had set them off. Sheriff ***** told me he would get those names for me later. I also asked the sheriff the name of the officer that was dispatched that night and he said it was Deputy *****. Then, the Sheriff left.

April 8, 2009

9:00 AM: I arrived back in Scammon to take some still shots, interview area witnesses, and get a GPS reading of the suspected landing/hovering site.

1843(a)(2) **9:45 AM:** I visited the home of [redacted] ***** located at 1843(a)(2) across the street from the school and adjacent to the field described by ***** as where the craft had landed. I was hoping for access to the field for soil samples, a quick sweep with my metal detector and a walk through with my Geiger counter. The brother of [redacted] ***** greeted me at the 1843(a)(2) door [redacted] and his wife ***** were both at work and the brother [redacted] was 1843(a)(2) from out of town. ***** had arrived Sunday night April 5th and not seen anything unusual. I asked for his brother's phone number but ***** claimed that he didn't know it. I knew I could find it later so I thanked him and left.

10:00 AM: I drove through town trying to find other witnesses on my list who might be home, but had no luck.

10:30 AM: I decided that it was time to leave Scammon. I had about a 325 mile trip and I could finish my research on-line or by phone.

04/23/09: To date, no new information has been obtained. I called Burlington/Northern and made inquiries about April 5th from 1:00 to 1:30 am and the engineers pattern of whistle blasts, but was told that whistle blasts vary. After several requests for the police report on April 5th, I still have not received an answer. Nor, has the Sheriff provided me with the name of the person who set off Chinese Lanterns or the name of the person reporting this action. I have also made several attempts to call the ***** and Officer ***** but have had no answer.

I don't believe that the *****s saw Chinese Lanterns. What they saw they described as being as large as a small house. They viewed this from 4 to 5 street blocks away hovering at times about 200 ft above the tree tops. They watched this object leave at a high rate of speed, and then return, finally disappearing behind trees and out of sight. Conclusion: UAV unknown

I will add any new information as it becomes available.

AAP Person 103

GPS Coordinates: 1843(a)(3)

1843(a)(3)

Location: Dardanelle Arkansas - Cat 2 Deployment

Date of Event: April 20, 2009

On April 25, 2009 a STAR team CAT 2 Deployment was activated on this case. STAR team Investigator [AAP Person 103] was assigned as lead investigator.

[AAP Person 59]

MUFON (Mutual UFO Network)
STAR Team Coordinator / Manager

[AAP Person 59]

WITNESS NARRATIVE: (Witness: [1843(a)(2)] "*****" *****) i left my house in ola arkansas, at approx. 520 am to pay a bill at danville at the drop off box, internet bill. i took i believe it is hwy 27, you can look on the map , it may be hwy 28, but as i got on the long quiet hwy that seems to take forever to get to dardanelle, long boring road, i noticed a star in the sky that had a tail attached, it seemed to be way out in the universe, a few minutes later , i saw the same star alot closer up to the upper left of my drivers side window, and it appeared to be alot closer,... as in hovering over the nevo mountain. i thought oh its the radio tower but still felt on edge and watched as it moved within a 100 feet of me and i could see florescent lights 3 , on each side of a triangular figure. i kept thinking i am close to nevo mountain that has to be their lights, but the lights moved closer, i became really scared... rolled up my windows, ran off the road twice trying to get a good look and i saw the same rotating lights 3 on each side of a triangle. my car started a constant vibrating sound (sound like a flat tire)i started to call 911 and my phone was dead, it was fully charged . then all of a sudden there was a flash, like a light bulb had totally illuminated the road and my vehicle. and then the drive home was non-eventful, my car was driving sound and secure and as i drove futher i was nowhere near mt, nevo.although i watched my vehicles clock the entire time , there was no missing time in the event./ what also i would like to add is that this is the second encounter of ufo activity i hve encountered, and 3 other people in 3 different places can back me up, because in or around 2003 or sometime in that area, 3 different people have seen what i have seen in three different places at the same time. also we have a nuclear plant in london arkansas, it is not far from us, we are in the evacuation route area if this helps any.also when i got to work i checked my tires and all were fully inflated, no signs of a flat. my phone did not work the rest of the day , i had to fully recharge when i got home, i didnt think it was gonna work for a while, took alot of charging.

Discussion with Dispatcher: late this afternoon uncovered the following:
At 5:20 am witness was on way to work Apr. 20-09 . The witness is a Nurse.

Witness was driving on highway encountered large Triangular Shaped craft - proximity within 100 feet at closest point. Witness said triangular vehicle was size of a B-1 bomber (her husband was in US Air force and she has been to many air shows)

Heard loud rumbling sound, describes as like when you get a flat tire. (were no flat tires on vehicle after event)

As vehicle was directly over her car, there was a Bright flash of light that illuminated road surrounding her vehicle and lit up inside of car, the ran car off the road twice.

Event Blew out her cell phone - battery dead (was fully charged before incident) would not hold charge after for a long time. She tried to call for help without success

Witness experienced physical effects upon arriving at work. Co-workers indicated she looked very ill; she tried to speak and could not talk (no voice - hoarseness) for a while and the co-workers voices were very loud (so loud sound reverberated in her head) caused pain.

Interim Report – Arkansas, Case No. 16644 –

AAP Person 103

Witness 1843(a)(2) *****

Our plane on the way out was cancelled due to an auto pilot failure. We were able to get a later flight out through Atlanta. Our flight from Atlanta was also delayed so that we arrived in Little Rock late and by the time we drove to Dardanelle it was 6:00 p.m..

we met with:

State Coordinator,

1843(a)(2)

Since it was due to rain on Monday, we felt it best to go immediately to the site. ***** had driven the road again in the morning to determine just where she was when this happened and she was able to go right to the spot where she saw the flash. marked the fence with duct tape at the site so we could go right back to it. As we drove out, we noticed power

lines which sometimes crossed over the road. ***** had not even noticed them.

There is also a power plant nearby, Arkansas Nuclear One (AAP Person 59) has instructed us to contact the security department there.) [redacted] talked to 1843(a)(2) ***** about signing the media release. ***** does not want her name used or her image. We may use her voice and refer to her as 1843(a)(2) because no one here calls her that.

The first thing ***** saw looked like a distant star but what drew her attention to it was that there was a straight line in back of it. It got larger as she watched it. She also started thinking that her right rear tire was getting a flat because she heard a noise but she didn't really feel anything different. The car wasn't swaying. It seemed to her like dashboard wasn't lit up as it should have been. Her headlights weren't illuminating like they should have either. She got concerned for her safety and rolled up her windows. She tried to call 911 but her phone wouldn't work. She had used it the night before and that morning and believed it to be fully charged. As the craft got even closer, all of a sudden she could see three silverish, metallic blue rotating lights on each side of two sides. She started running off onto the side of the road trying to watch it. She watched the lights for approximately 20 minutes. At first she thought the light was from coming from Mt. Nebo. In the early morning light, she could see the line of the hill but the object was lower than that. The body of the craft was black, dark. There were 3 lights on each side of two sides on the bottom of the craft. She couldn't see anything on the back side but there is no doubt in her mind that the craft was triangular. When she held her hand out in front of her, the size of the object was larger than a baseball. The craft appeared to be tilted. She was then absolutely stunned by a flash...it reminded her of a camera flash and illuminated everything below it....going several feet in front of her car. She wondered to herself if she was having her picture taken and if they could read her thoughts. The craft was hovering but made no noise. After the flash, she looked back and the craft was gone. Her tires are just as they were with no apparent damage.

At the time, ***** was fearful of being stranded and alone on a deserted road that she's not familiar with. Later, she felt she was in shock. She walked into work and one of the girls came up to her and said what's wrong with you? The night nurse's voice was killing her ears. She went to say good morning and couldn't; her throat felt like it was choked up from the

experience (rather than something that was done to her.). She went out and had a cigarette. She felt very irritable....with raw nerves. She managed to get through the day and forgot about it until noon.

When she got home from work, she started researching on the internet. She didn't tell her son until a couple of days later. It was [1843(a)(2)] who encouraged her to file a report.

We video taped ***** talking about the event at the site. We then all returned to Russellville to go to dinner. After dinner, we went out to look at *****'s 2004 Santa Fe compact SUV. ***** had felt that the problem that she was experiencing was on the right hand side but a compass showed about an 80 degree change in direction when the compass was brought close to the back left panel. She also gave us her phone to look at.

***** initially told us that she was off of work on Monday. At the end of Sunday night, however, she told us that she had to work on Monday and would be off on Tuesday. She agreed to call us after work. [] also 1843(a)(2) had to work on Monday but ***** was available and wanted to join us.

On Monday, we went back out to the site and approached the farmhouse at the site [1843(a)(2)] No one answered the door but there was a sign saying that if no one answered to look for them in the barn. We went into the backyard where we met [] 1843(a)(2) and her elderly father, ***** . ***** was extremely friendly and seemed quite interested in hearing about the event. She had left home on April 19th, the day before the event and hadn't seen anything. She added, however, that the pasture in back of her home (close to where we believe the flash went off) was a Cherokee Indian campground many, many years ago and that some strange things have happened there. Her daughter has taken pictures on the property which, when developed, show orbs. ***** believes that her daughter also saw orbs with her own eyes. She will talk to her and see what information she can get for us. ***** herself is part Cherokee. She also added that there was a medicine man years ago in Chickalah (pronounced chick key la)- which is not far away.

***** talked with *****'s father, [1843(a)(2)] He said that they have quite a few deer every day in the pasture. Once or twice a week they will all of a sudden bolt for cover in the trees and then will quickly return to where they

were and continue grazing. This appears to be quite abnormal behavior for deer.

AAP Person
103

The weeds in the pasture were curled but this was explained by the fact that they had used weed killer. [redacted] took a number of pictures, particularly of the power lines. They are 180,000 KV power lines – a direct feed from Arkansas Nuclear One. In one of the pictures, he zoomed in and believes he captured the number on the tower. He checked the ground radiation level here and found it to be lower than normal. We also drove along the road, before and after the mark on the fence, taking video as we went.

AAP Person
103

Arkansas Nuclear One: We had been unable to get a telephone number for Arkansas Nuclear One so we drove there. We were met by a guard who contacted the security department by telephone [redacted] 1843(a)(2) [redacted] talked with [redacted] [redacted], the Security Officer on Duty. [redacted] said he was in the middle of something and couldn't make any inquiries at the time. He said he would find out if anything such as that could be monitored by the control room. If it was not being monitored by the control room then it would be monitored in the delivery section, another part of the facility. He would try to get back to [redacted] tomorrow.

AAP Person
103

We had lunch and then returned to our room where [redacted] downloaded video and pictures to his computer, including [redacted]'s. [redacted] and [redacted] went off to a local Hyundai dealer. They used a compass on the 2009 Santa Fee and found that there was a significant movement of the compass needle on the back left panel of this vehicle and some other areas of the car. The salesman said that the body has changed quite a bit since 2004, but we felt this brought our findings on the experimenter's vehicle into question.

AAP Person
103
1843(a)(2)

[redacted] and [redacted] 1843(a)(2) met us back at the Best Western after work. We did another video with [redacted] in the room. At the end she also talked just a bit about another sighting in 2003. At that time she saw three triangular shaped crafts (which flew in a triangular formation) about 1:00 a.m. in the morning. She talked to two other people who weren't with her at the time but whom she believes may have seen the same craft at the same time. We've asked her at least three times if we couldn't meet with one of her co-workers and she continues to be resistant to this idea.

***** drew a picture of the craft that she saw. [] also checked *****'s sinus cavity area with a magnet to see if she might have had an implant there but found nothing abnormal.

AAP Person
103

[] did look at the cell phone and it appears that the cell phone was functional however the battery's internal fuse was blown. This is not a common occurrence and is usually the result of a high voltage insult.

Although ***** was very friendly, she said it would be better to talk more in the morning. We will return there with ***** and ***** tomorrow. We also hope to obtain more information from the Security Officer and perhaps obtain more documentation on the Indian presence in this area.

AAP Person
103

Our conclusion at this point is that this was a real event. At this point [] has several thoughts regarding the cause of the flash. It could be that the craft got too close to the high voltage wires or it could have been extracting energy from the wires or unknown (awaiting report from Arkansas Nuclear One). The object is definitely unknown and does not appear to be a military craft. There is also the thought that the noise that ***** thought was a bad tire on her car could actually have been an extremely low resonant frequency emitted by the craft, which went away when the vehicle disappeared.

4/28/09 ***** arrived at the designated time of 8:30 a.m. We waited at the motel for ***** until about 8:40 and then called her. ***** said that she wasn't coming... her daughter had taken her car and she wouldn't be able to join us. It seemed quite unusual that she hadn't called us to tell us this earlier. ***** called her back and said he would be willing to pick her up. ***** agreed to this so ***** went to get her and we drove out to the site so that we wouldn't be too late.

I talked to ***** about using her image and name. She did not want her name or image used because of her job. She did sign a release allowing us to use her voice and said that we could refer to the property as the ***** property. ***** bought the property in 1994 (bringing it back into the family). At the time or shortly after she bought the property, she was asked if she really bought the property as the previous owner said that nothing would grow there and that their animals were sterile. She has not had any problems with growing things or raising her horses and cattle.

***** did say that there have been some other strange events though. Most notably for her are the significant number of people who have gone off the road and hit her fence. There have also been two occasions when whole sections of her fence have been pulled up and moved. In 9/06, a large section of a fence was just pulled out and laid down, That fence included railroad ties and solid oak boards. There were no storms or bad weather. Then towards the end of March of this year, she got up at 5:00 a.m. to leave the house early. There had been a storm and there was no electricity. As she left the house she saw that 40-50 feet of fence had been picked up and laid down. In this case, she noticed that the landscape timbers broke off under the ground. Her horses could not do this. She also mentioned that they do get static on the radio in this area. She does not get cell phone coverage in her house except in one of the rooms. Sometimes they will have a huge storm out in back and the front of the house will be totally still. They have experienced shocks underneath the high voltage lines even though the energy company claims that can't happen. *****'s e-mail address is [1843(a)(2)]

Neighbors also report strange things. One of the neighbors reported (to *****) seeing a big black panther - even though there aren't supposed to be any panthers in this area.

*****'s brother dropped in by chance while we were there even though ***** hadn't told him anything about the incident. He works at Arkansas Nuclear One in calibration and maintenance. He was not aware of any recent line disturbances but he believes that he will be able to obtain that information. What he did say was that he saw a dark helicopter flying very close to the plant within the last two weeks. He has never seen this before and said that they must have had approval for them to be flying that close. He will get back to us with whatever information he can obtain. The tape recorder was running when he came in and we didn't think to mention it to him until we were well into the conversation. He did not feel he could sign a media release because of his job. He also talked about getting shocked near the high voltage wires saying that he had been knocked down to his knees.

We said good-bye to ***** and drove ***** home and checked out of our motel. In the meantime, ***** went on to talk to the deputy sheriff of [1843(a)(2)] The deputy sheriff was very interested in hearing about the event; he had not heard of any similar events in the area but took *****'s and [] cards to contact in the future in the event that

anything else arises. We are going to ask [1843(a)(2)] to check out the Heritage Room of the Dardanelle Public Library regarding Indian activities in this area..

The GPS location is [1843(a)(3)]

[1843(a)(3)]

In order to complete this report we would like to send a FOIA to both the power plant and the FAA. We want to find out if we can learn any more about Indian activity in the area and also search for information on ley lines in Arkansas. We will enter the additional information onto CMS.

Investigator Report:

I. Initial Meeting with Witnesses

I set up an interview with ***** and ***** at 12:00 P.M. on Monday June 3, 2009. I called to let them know I was on the way. There was no answer so I left a message. I arrived at their apartment on time and knocked on the door. There was no answer there as well. Their neighbor was outside smoking a cigarette; so to make sure I had the correct apartment number I asked if ***** and ***** were home. She said yes and that she had just spoken to them 15 minutes ago. She said that they were inside. I found that kind of odd. I decided to grab a quick lunch and come back. As soon as I left ***** gave me a call. The first thing he said was "How long is this gonna take?" Second, he wanted to meet in a public place. There was an outside Bar and Grill across the street so that's where we decided to meet.

When I met ***** and ***** I could tell right away that they were highly paranoid. ***** refused to shake my hand and ***** kept his distance. ***** seemed distracted as he was cautiously watching everyone in the restaurant. I suspected that he was checking to see if there was any surveillance being carried out on them.

Before I could conduct a proper investigation, ***** started his own interrogation. To make them feel as comfortable as possible I allowed him to fire away questions until he was satisfied. But that wasn't enough. ***** wrote down my MUFON ID number and TX DL information. It seemed as though he was going to do a full background check on me once he returned home. ***** refused to do the interview with my digital voice recorder. He also did not want me to take any notes. Through much difficulty I was able to persuade him to let me take notes. Twice during the interview he checked to make sure my recorder was off. He also wanted to catch me in a lie, as he would ask specific questions to which he already knew the answers. I believe his main concern was to make sure that I was

not apart of some rouge intelligence organization. ***** wanted to dominate the investigation. So for a little while I was the "punching bag". But after 15 minutes or so he became comfortable enough that I could conduct a proper interview.

II. The Prairie Dogs

Shortly before the incident while ***** was driving he noticed a prairie dog sticking its head out of a small hole in the middle of the road. After a near miss, he decided to pull over and take few pictures of it. To his astonishment there were around 20 or 30 prairie dogs scattered around both sides of the road. One thing I found interesting was during this part of the interview ***** would repeatedly argue with ***** about the size of the prairie dogs. While ***** insisted to me that the animals were at the normal size of 12 to 15 inches, ***** was absolutely certain that they were at least two or three times that size. While taking the pictures ***** felt a weird sensation. He described it as "a feeling of being watched". His intuition was telling him to get in the car and leave. ***** also felt uneasy at this particular moment but when ***** and he got back in the car they both felt better. They traveled some distance down the road but ***** could not be sure of exactly how far. He estimated it could have been from 1 to 20 miles. It was somewhere between there where the close encounter occurred.

III. Close Encounter

In both descriptions their story stayed consistent with a few minor differences. Listed below are the short descriptions of the UFO event taken from the CMS: case #17097 and case # 16814:

Below are the un-edited witness narratives submitted by ***** ***** and ***** ***** in their respective case reports.

[CASE 17097]

A: ***** ***** <> *On a recent trip with my partner heading towards Big Bend State Park , just past Marathon Texas. While driving around noon on a sunny day ,I noticed a shadow cross over the hood of the car. I thought it was probably a bird casting a shadow . Within seconds out of the corner of my right eyes I saw something very bright heading towards the passenger side of the window at a rapid speed . I turned my head towards the passenger window and noticed that my companion was staring out at the same object. It looked like a extremely bright form with blowing arm like extensions faster than seconds it appeared to pass thru the car. The entire car interior was white , absolute white , I could not*

see anything outside nor inside, although I was still facing the passenger .The stereo was on but I don't remember any sound either just glowing bright light. I have no idea how long the form took to pass completely thru the car . The car seemed to move back and forth with a jolt. The next thing that I remember is that my hands grabbed the steering wheel and I turned towards my partner and said " Why are we doing this ." We apparently were still facing each other, he has a terrified look on his face and shakes his head. I said "What happened ?" He said something hit the car. I reached out and stopped the swinging motion of the cross hanging from the rear view mirror . Realizing that the swinging motion supported the fact that the car had moved violently. I look in the rear view mirror to see if anything was behind the car , as if I had hit something. There is nothing behind us .Both of us turn and look out of the window trying to determine what had slammed into the automobile . Nothing around us behind us . I almost stopped but thought that whatever had hit the car might somehow somewhere be outside . I slowed down still visually searching for some kind of animal , object , thing but nothing seemed visible. Let me mention that it was around noon on a clear day. I had a CLEAR mind and was in a calm mood . I am a logical person and do not seek fiction in life . Factual and sensible. This is a occurrence that both my partner and myself witnessed at the exact same time
[CASE 16814]

B: *** <>** My Partner and I were driving to Big Bend National Park on vacation. We were about 50 miles south of Marathon, Tx on 385 heading south. It was a clear day, and we were both well rested and excited about our trip. I was gazing out the window at the mountains and the desert terrain. We had to be doing about 85 mph. I was in the passenger seat. I noticed out of the corner of my eye something extremely bright and moving fast toward the car. I saw what looked like a teardrop shaped head for lack of better words with a thin line of what appeared to be a shiny band of silver wrapped around the center. I thought I saw what looked like a figure in a running man pose supporting the teardrop head, but I couldn't be absolute because the entire thing was engulfed in an indescribable white light, and was followed by light tracers. I don't know if the figure or thing moved through the vehicle but as quickly as i saw the thing the cab of the SUV was filled with the light. The vehicle moved in an upward circular motion but never left the ground kind. The light exited the vehicle on the driver side. I saw my partner who was driving look at me. He was pale white and disoriented, and he said to me "What are we doing?". I said, "I don't know." And

that was it. A Few things:#1. The radio was playing in the car quite loud, however when the light moved through the vehicle there was no noise, not even the sound of the car on the road. #2 When the light was in the vehicle, it was all you could see. No definition to anything, just white light. After it was over I did not see spots like one normally would after being exposed to UV lights. #3 My partner was driving the whole time, and never lost control. #4 It was not cloudy, it was broad daylight. #5 There were no other cars in sight.#6 There were no bumps or dips in the road to excuse the motion of the vehicle.#7 No dust devils in sight before or after.#8 The vehicle was not damaged in any manner.#9 We were completely sober.#10 We had the same experience with slight detail differences. #11 We were panicked right after it occurred, but shortly after we were very giddy.#12 We didn't discuss it much after the vacation was over, however when we got home, every time we discussed it together we would get extreme anxiety. When we discussed it separately with our friends we were okay.

IV. Additional Details

There were several details which I was able to obtain from the interview that were not mentioned in the CMS narratives. During the close encounter when the light engulfed the vehicle, ***** described it as "being inside a mayonnaise jar but still able to breathe." He also noticed tiny "dot sized", metallic objects which appeared to be floating in the light.

In *****'s description of the incident he said that" it was like having white paper surrounding him." They also said that once the encounter was over, they felt strange or "sort of out of it". As they continued to drive it was several hours before the full realization of what had happened occurred to them. According to the witnesses description it might indicate that they were an altered state of conscienceless as a result of the encounter. Sometimes referred to as the Oz phenomenon as described in UFO literature.

The type of vehicle that was rented was a 2008 Black Nissan Rouge Mini SUV. It was rented from Hertz at one of the two Airports in Houston, Texas. I have been trying to obtain the receipt for the rental, but ***** was unable to locate it as he has just recently moved. He suspects that it's in a box mixed in with other personal papers. When he finds it he will contact me.

Due to the fact that they do not know exactly where the encounter occurred, there is no way to obtain exact GPS coordinates of the site.

Witness testimony indicates that ***** and ***** had an unusual encounter. They appeared to be sincere and truthful in their testimony to this investigator, although no physical evidence was obtainable at this time.

AAP Person 59

Background Summary:

- Witness was feeding horses 5/18/2009 Sunday about 12:30am. facing west

- Witness first noticed that lights were flying very low (going way to slow to be an airplane) and appeared to have just flown over Buffalo
- Witness described object with blue, red, and white strobe lights (were large and in line with each other) with quite a bit of distance in between all three. The middle light was white and strobe very slowly, and the red/blue lights were on the ends.
- The lights turned and were coming directly towards witness at a diagonal angle, the white light was covered with a round, concave, clear, glass-type covering which appeared to be very thick glass, and had some type of circular design on it.
- The red and blue lights were different than the center light. They were tall and cylinder shaped, more like beacons, and they appeared to be sitting on top of something, and appeared to be covered by a different type of material, it looked more like some type of colored plastic, but transparent enough that the lights underneath could shine through.
- Witness never saw a shape or even any type of structure behind the lights.
- Within 10-15 seconds the lights had reached the dirt road in front of witness, and where crossing over the top of the power lines. It became apparent that the lights were slowing down as they got closer, and were now nearly at a complete stop.
- Witness ran from the corral to pickup and jumped inside, which took about 15 seconds, (wearing flip flops) Once in the pickup truck witness was now facing north, and the lights had moved just behind the corral and had turned south, facing witness again. THE LIGHTS WERE SITTING COMPLETELY STILL, HOVERING, ABSOLUTELY NO MOVEMENT, other than the strobing white light. The distance from witness and the lights at this point was estimated around 150'.
- Witness thought it was a single craft, and judging by the distance of the lights from end to end, would have been anywhere from 40-50'.
- For about another 5 seconds witness fumbled trying to find cell phone, and staring at the lights in disbelief.
- Witness indicated this was the most terrifying moment she ever experienced.
- Witness drove forward, and got to the gate leading out of the pasture, stopped looked over shoulder, the lights were still sitting in the same place, NOT MOVING. Witness couldn't go towards town without passing close by the lights, so turned south. (And laid the pedal down).

- About a 1/4 mile down the road, witness turned and looked over shoulder, and the lights were no where in sight.
- Witness indicates behind the corral a large portion of the grass is laid down, and Witness took some pictures of that area.

Witness Narrative

I was feeding my horses last Sunday about 12:30am. I was standing facing west, all of the sudden some very low flying lights caught my eye. I first noticed that the lights were flying very low, and then that they were going way to slow to be an airplane. There was a blue, red, and white strobing light and they appeared to have just flown over Buffalo. The lights were large and inline with each other, with quite a bit of distance in between all three. The middle light was white and strobed very slowly, and the red/blue lights were on the ends. The lights turned and were coming directly towards me at a diagonal angle. The white light was covered with a round, concave, clear, glass-type covering which appeared to be very thick glass, and had some type of circular design on it. The red and blue lights were different than the center light. They were tall and cylinder shaped, more like beacons, and they appeared to be sitting on top of something. They appeared to be covered by a different type of material; it looked more like some type of colored plastic, but transparent enough that the lights underneath could shine through. I never saw a shape or even any type of structure behind the lights. Within 10-15 seconds the lights had reached the dirt road in front of me, and where crossing over the top of the power lines. It became apparent that the lights were slowing down as they got closer, and were now nearly at a complete stop. I turned and ran from the corral to my pickup and jumped inside, which took about 15 seconds, because I was wearing flip flops. Once in the pick up I was now facing north, and the lights had moved just behind the corral and had turned south, facing me again. THE LIGHTS WERE SITTING COMPLETELY STILL, HOVERING, ABSOLUTELY NO MOVEMENT, other than the strobing white light. The distance between me and the lights at this point was probably around 150'. I felt it was a single craft, and judging by the distance of the lights from end to end, would have been anywhere from 25' to 50', I cannot judge distance very well, plus I was busy running to my vehicle. I lean more toward 40-50'. For about another 5 seconds I fumbled trying to find my cell phone, and staring at the lights in disbelief. This was the most terrifying moment I have experienced, I threw the pick up in reverse, then drove forward, and when I got to the gate leading out of the pasture, I

stopped looked over my shoulder, the lights were still sitting in the same place, NOT MOVING. I couldn't go towards town without passing close by the lights, so I turned south and laid the pedal down. About a 1/4 mile down the road, I turned and looked over my shoulder, and the lights were no where there or anywhere in sight. Since the incident I have driven behind the corral and a large portion of the grass is laid down, which maybe due to wind current, I took some pictures of that area. I have been fascinated by the UFO phenomenon since the massive sightings in TX/PA in 2008, and thought if I ever saw one, that I would be brave and take pictures and size it up. I was so scared and I had an innate feeling that if I didn't leave fast, something bad was going to happen. This is a very small town and I do not want any notoriety, if you wish to do an investigation or speak to anybody from this area about this incident, please contact me first. Thank you.

Investigator Narrative: 5/29/2009

Arrived in Woodward OK. At 2:30 PM CDT. Woodward is 35 miles South of Buffalo OK. This is where the sighting took place. Contacted the witness and made arrangements to meet at the site. Arrived on scene at 5:30 PM CDT.

Upon meeting the witness her sincerity and creditability was very evident. So was her fear and apprehension. It appeared that the witness experienced something traumatic. Introductory discussion ensued followed by site evaluation. Initial photographs of the affected area were taken and measurements of that same area were acquired. As dark fell it became apparent that a lot can be seen in the dark sky and the witness appeared nervous over every moving light but all observed that night was explainable.

Initial evaluation of the site showed a definite disruption of the area where the alleged Craft hovered or landed. The entire area appears dead with three areas where the vegetation is crushed in a swirled pattern. A scan using a handheld Geiger counter showed no abnormal reading and no evidence of radiation. Photos were taken and clearly show the condition of the affected area.

Animal Reaction

Two of her horses had a material "splattered" on their backs. It did not appear to be lather as the horses were not worked or ridden. Further more, "Red" the alpha horse had developed 4 perfectly round, white spots on its coat. Three on her front flank in the form of a triangle and one lone spot on her rear flank. Now, the witness knows her animals and swears that the spots literally "appeared". It was not a stain but rather the hair had changed or had lost its color. According to the witness there were behavioral changes as well. The horse generally eats uninterruptedly but now will just stop in mid-chew as if pondering or sensing something, stand perfectly still, then shiver and continue eating. Furthermore, the witness contends that her dog, which was present during the event, refuses to return to the site. It will not even willingly get in the car and if forced to go just lies on the floor and quivers.

This investigator has consulted with an equestrian expert who advised that horses do not lather on their backs but they do sweat. Also after reviewing the white spots it was determined that it could be something called a "Freeze Fire" which occurs as a result of a medical procedure whereby an extremely cold instrument is applied for whatever purpose. However, it must be noted that this type of phenomenon can also be cause by certain bug bites.

It was now too dark to continue so arrangements were made to revisit the sight the following morning. Arrived back at the motel at 11:00PM.

5/30/2009

Arrived at the site at 10:30 am. This investigator chooses to arrive early so as to collect samples and specimens alone. Samples of the affected grass were taken as well as control samples from an area about 200ft. removed from the subject area. The same procedure was used to acquire soil samples. Investigator then proceeded to the witness home to begin the formal debriefing. Following a detailed discussion in which the witness repeated the events sited in the background report and also revealed her growing sense of apprehension we proceeded back to the site to attempt a video interview and to acquire additional video of the area of concern. We also wanted to take specimens of the anomalies on the horse's coat.

Everything was accomplished with the exception of the horse samples. Seems they were not willing to return to the corral until their nighttime feeding. That

necessitated another trip to the field tomorrow. Arrived back at the motel at about 6:00 PM.

It should be noted at this time that the area (Buffalo, Oklahoma located in the county of Harper) is completely surrounded by hundreds of wind turbines. These things seem to be constantly working.

5/31/09

I met with the witness about 8:30 AM. and secured specimens. Then after a final discussion in which the stated details of the case were reaffirmed I returned to the motel to check out. Enroute from Woodward to Oklahoma City I contacted the Harper County Sheriff Dept. to inquire as to any other reports or sightings in the area. I was told no, but the person who answered the telephone, talking on the promise of anonymity, revealed that starting around 2000 or 2003 there were multiple cases of cattle mutilation. The town of Seilman in Harper Co. was mentioned as well as Dobby Springs and the Appleton Ranch all of these are in the same general area.

Developments to date

This investigator found the witness to be intelligent, creditable and sincere. Given the testimony, photographic evidence, and a variety of specimen samples, this is a potential CE3 case. Supporting photographic evidence and test analysis will be posted to CMS when available

According to witness testimony (in subsequent telephone conversations) she claims to be experiencing recall and shadowy memories. She apparently was a lot closer than she initially reported. She remembers actually standing next to the craft but still cannot recall specific details of the craft. She is also remembering strange markings and bruises on her body that she didn't recall at the time she reported the event.

This concludes her testimony to date.

Samples for analysis taken by Investigator AAP Person 112

Chain of custody: Samples were taken personally and held by investigator, transported on airline in carry-on luggage, which was in sole possession of

investigator. Investigator hand carried samples through security and they were not X-rayed. Samples were placed in new clean zip lock bags and transported and stored at ambient temperature (no refrigeration). (Knife and scissors were used to collect samples and were cleaned and dried with alcohol swab after use, for each sample taken)

Soil Samples:

- **Control sample of soil** taken 200 feet away from affected area, approximate size of teaspoon. Sample was extracted from ground with a Knife and placed in a clean new Zip lock bag 3" X 3" and it was labeled "control sample Soil 5-30-09"
- **Soil Sample** taken in center of affected area (middle of swirled area) approximate size of teaspoon. sample was extracted from ground with a Knife and placed in a clean new Zip lock bag 3" X 3" and was labeled "Soil Sample 5-30-09"

Vegetation Samples:

- **Control sample of vegetation** (grass / grain) taken 200 feet away from affected area approximate size (cut with knife) one strain with grain placed in a clean new Zip lock bag 3" X 3" and was labeled "Control Grass 5-30-09"
- **Sample of vegetation** (grass / grain) taken (cut with knife) in center of affected area (middle of swirled area) one strain with grain placed in a clean new Zip lock bag 3" X 3" and was labeled "Grass Specimen 5-30-09"

Horse hair samples:

First Horse - identified by the name RED

- **Control sample of hair** taken from horses back, cut with scissors approximately 100 pieces 1/4" placed in a clean new Zip lock bag 3" X 3" and was labeled "Control Sample RED 5-31-09" Horse is identified by the name RED
- **Hair sample taken from white spots** on horse, cut with scissors approximately 100 pieces 1/4" placed in a clean new Zip lock bag 3" X 3"

and was labeled "White Spot RED 5-31-09" Horse is identified by the name RED

- **Hair sample taken from splatter area** on horse, cut with scissors approximately 100 pieces 1/4" placed in a clean new Zip lock bag 3" X 3" and was labeled "Splatter Sample RED 5-31-09" Horse is identified by the name RED

Second horse - identified by TRESSIE

- **Hair sample taken from splatter area** on horse, cut with scissors approximately 100 pieces 1/4" placed in a clean new Zip lock bag 3" X 3" and was labeled "Splatter Sample TRESSIE 5-31-09" Horse is identified by the name TRESSIE

End Report

AAP Person 112

Case #s 17360, 17478 CAT 2 MUFON Deployment

Investigators:

AAP Person 103

AAP Person 104

GPS COORDINATES :

1843(a)(2), 1843(a)(3)

COORDINATES ACCURACY: 100%. Home of witness.

LOCATION:

1843(a)(2), 1843(a)(3)

DATE OF EVENTS: #17360 various dates prior to 6/2/09

#17478 on 6/13/09

TIME OF EVENT: #17360 Various times, generally 10:30 p.m. - 11:30 p.m.

#17478 11:30 p.m. () Exact (X) Approximate

On 6/14/09, a STAR team CAT 2 Deployment was activated on a case in the Trego, WI area (Case #s 17360 and 17478). STAR Team Investigator AAP Person 103 was assigned as lead investigator. STAR Team Investigator AAP Person 104 assisted.

AAP Person 59

MUFON (Mutual UFO Network)
STAR Team Coordinator / Manager

Investigator Report:

6/16/09

11:30 a.m. - 5:30 p.m. Left home to drive to northern Wisconsin and home of experiencer. Checked into motel in Spooner, WI and called *****.

5:30 p.m. - 10:30 p.m. Traveled to *****'s home; ascertained GPS coordinates; obtained signature on both release forms; filmed interview; reviewed some of her pictures on her home computer; utilized magnetic detection device and radio frequency analysis equipment (0-10 GHz) to check for any potential implants, skywatched until it began to rain and then returned to motel.

6/17/09

8:00 a.m. - 9:00 a.m. E-mail to ***** , watched video which ***** provided to us regarding [1843(a)(2)]

9:30 a.m. - 10:15 a.m. Work on report.

5:30 p.m. - 12:15 a.m. Met with ***** , significant other [1843(a)(2)] and son, ***** . Further examination of her pictures and skywatched. Took approximately 150 photos which will be examined at home using adobe photoshop or NX2. Did radiation survey (low background readings). Obtained disc of her pictures. E-mail sent to State Director and [AAP Person 59]

6/18/09

10:00 a.m. to 11:30 a.m. Worked on report. Drove to Washburn County Sheriff's office to advise them of area sighting and request that they inform any future witnesses to file a report on our Case Management System at www.mufon.com.

7:00 p.m. to 11:30 p.m. – Met with witness. Conducted additional interview to resolve questions, particularly related to first report. Skywatched and took photos. We received a telephone call on the way home from ***** , saying that she and [] had both seen a large object after we left. Narrative follows.

1843(a)(2)

6/19/09

9:00 a.m. – 3:00 p.m. Traveled home. E-mailed and spoke on telephone with witness. Provided website info on [1843(a)(2)] a Minnesota hypnotherapist who has assisted MUFON witnesses in the past.

6/21/09

6:00 p.m. - 11:45 p.m. Worked on report.

Narrative:

The investigators met ***** ***** on the farm which serves as a not-for-profit animal rescue facility. ***** 's primary interest is rescuing horses but we also saw many dogs, cats and a couple of emus.

***** was born on [1843(a)(2)] and was raised in [1843(a)(2)]
Her immediate family was comprised of her mother, father and a brother who is two years older. She described her brother as highly intelligent, despite the fact that he is autistic. She attributes her patience, acceptance and ability to look at things in a different way from growing up with an autistic brother.

[1843(a)(2)]

*****'s father had an experience when he was at a drive-in theater in Coon Rapids, MN. He and half of the people there saw a huge disk (about the size of a football field) with multicolored lights going around it. It stayed over the theatre for a while and then zoomed off. That would probably have been in the 1950s.

***** feels that she has always been psychic since she was 8 or 9 years of age. Around that time, she had a dream that she was being held in a humungous ball of light, under enormous pressure. Everything was completely white. It was like she had been scooped up and captured and held there. In the dream, she couldn't move her arms or legs and was totally paralyzed. She felt suffocated. She woke up scared and crying and immediately went to her mother. Her mother more or less dismissed the dream but ***** says that she has always carried that experience in the back of her mind. She gets a "feed" (communication) from something but she can't pin it down to one kind of thing. Sometimes the communication is very negative. [1843(a)(2)] has helped her try to figure out how to "shut out the bad energy."

***** says that she has seen small balls of light for years. [1843(a)(2)] stated that he himself had seen one in their bedroom.

The tavern across the street burned down several months ago (it continues to operate out of a garage) and ***** felt a "huge release of negative energy" afterwards. Her life changed; she slept better and she wasn't getting negative images or voices anymore. It was after this that she got the idea to go outside and take pictures of the sky.

***** tries to focus on the same area of the sky every night. Her "meeting point" is the Corona Borealis and the Vega star system. She really didn't know what she was looking at but that's where she saw activity so she looked that area up on the internet to identify it. ***** states that if she concentrates on one area and flashes her camera, things start happening. [REDACTED] is usually in bed as he gets up early for work.

1843(a)(2)

***** actually spoke about 3 particular sightings. She did not report the first sighting which took place about three months ago and was the start of her sky watching. The first object she saw was bright white oval light that came over the barn, traveling from West to East. It then shot straight up. This object was larger than the one in her second report – ***** estimated that it was about the size of a semi-trailer. [REDACTED] was in the house. She went in to get him but the object was gone and they didn't see anything else. ***** states that she never turned her eyes to the sky prior to this event. She knew it wasn't a plane because of her pilot training. (***** has 20 hours of flying to complete before she can solo and get her license. We believe she said that she flew out of the airfield at Rice Lake, WI. She seems to be questioning whether she wants to continue. She apparently told the MUFON dispatcher that she was a licensed pilot and entered "licensed professional" in case no. 17360. We found this discrepancy to be troublesome.)

After that, she started going out every night. ***** feels she was "told" to keep her focus steady on the Corona Borealis and Vega Star System. For some reason, she feels she "understands that constellation." Some nights she doesn't see any lights moving and then feels like maybe she should be checking herself "into a white shirt." At these times, she might call [REDACTED] crying.

Two weeks prior to our visit, ***** had a dream early in the morning. In the dream, she is watching the sky and there is a taller individual with her. She was watching two particular lights but then there was one. It started circling her; it felt like as if the light was "scanning" her. The tall person told her to put her hand

on the light and she remembers feeling a tingle and a pulse similar to the machine gun sound that she heard and reported in case no. 17478.

In the dream, ***** said that "they" communicated with her saying that they were going to give her a lot of information. They said that there was so much information that they were going to program it so that she wouldn't get it all at once; if she got it all at once it might destroy her. They did say that they were going to be "turning it up." She initially felt that there was a suggestion that she shouldn't share the information she receives but then she "asked" about talking to us and felt that it was okay.

***** feels that she will get important information. We humans are going to destroy ourselves and "they are trying to find a way to shake us up a little bit. Instead of being idle, they want us to look up and get a better perspective and learn some things that will help us save ourselves." According to ***** , there is a purpose for the people that they are contacting and she feels she has a rapport of some sort with them.

She wonders what it is about herself that they that they have chosen to communicate with her. She described herself as a "caretaker to the max" and thinks that they may be coming to her because she is so compassionate.

Regarding Case No. **17360**, the investigators were quite confused about this report until they realized that it actually represented a composite of sightings that had taken place over a number of evenings. ***** related that she usually goes out to watch the sky between 10:30 p.m. and 11:30 p.m., sometimes later. Her first report included the things that she found particularly interesting. She says that she has become aware of particular patterns in the past month and a half. She believes that she gets a significant light source which is followed by a significant event. She sets off the flash on her camera as a signal to "them." She can see lights moving back and forth but is not able to catch that on her simple Cannon SLR camera. ***** says that she was told to "play with your contrast because what you see isn't what's there." She then began using a photo editor on her computer, playing with the contrast and brightness to see if she could get a clearer picture of the light source. She usually sees one bright circle and says that "if you step it down," often there may be more than one component. Sometimes you get a circle, sometimes a triangle, etc.; there may also be other colors. Interestingly, she told us that one of the shapes she sees most often is an

acorn shape, yet she did not include this shape in case no. 17360. ***** reads what other people have seen on the MUFON website and feels that she sees many of those things. Sometimes when she sees certain shapes, she feels that they're trying to make her understand something but she's "not getting it." She feels there is content in what she is capturing with her lens.

The investigators observed ***** "stepping down" some of her pictures and did find a few of them to be quite interesting. ***** realizes that there may be dust particles on the lens and that she may also catch an occasional firefly on film but believes her pictures represent more than that. ***** avers that she is trying to represent things "in all honesty." For example, she stays away from the trees to avoid fireflies.

***** referred to her sighting, reported in case no. **17478**, as the "big one." On June 13, 2009 at 11:30 p.m. (99% sure of the date and 90% sure of the time),
1843(a)(2) ***** had taken her camera outside. [redacted] son and the son's girlfriend were sleeping in the camper near the house so she went down to a mounting stand near the barn. As she laid there, she could see many, many stars (however, see the weather report below which indicates that it was cloudy). There were moving lights but they were very small and her eyes were getting tired and blurred. She felt like they picked up on her thoughts. She remembers thinking in her head that everything was too far away, when she started to hear a roar off to the North. Because of her flying experience, she knew it wasn't a helicopter. It got so loud that it was "shake rattle and roll time." The object came over the tree tops. It was predominately red with brilliant green and brilliant blue lights, and the whole object gyrated around like a gyroscope. The roar seemed like a machine gun hitting the ground and it definitely was in front of the object (This reminded the investigators of the onion drive theory of propulsion). Per ***** , it wasn't going that fast..."it was moving with power, with purpose." At its closest, it was about the height of the barn 100 – 150 feet. Her first impression was that it was absolutely incredible....huge, beautiful lights. There was no impression of translucence; this was a solid group of lights. The noise itself was impressive. At one point she thought it might be a triangle...believes it was but it had different things going on with it so there was never any one shape. It was about the size of
1843(a)(2) [redacted] pickup truck. ***** tried to take pictures but when it got over her, she got the communication that "it's not going to do you any good because it won't turn out." Every time she flashed her camera she couldn't see it, then it would come back. She felt the whole event like it was similar in nature to somebody

coming up to her giving her a handshake....meeting her. The object then took off to the south. They "left with a message that they would be back."

The only picture ***** got was of horizontal red lights as it left. [redacted] came out of the house and he said that he felt an intense vibration. [redacted] didn't pick anything up. The length of the event was five minutes at most. [redacted] thought it was more like 45 seconds....he could feel as well as hear it; he said that random stuff shook within the house. ***** could hear people at the bar before and after the event and they seemed totally unaffected. The couple that was staying in the camper weren't aware of anything either.

When asked about effects on equipment, ***** said that she has had computer problems but does not know what to attribute it to. She didn't seem to link the problems with her sightings although she did enter "computer" on her form in case no. 17360. As far as her camera, she feels like the batteries have lasted a lot longer than she expected them to. She still feels that the lights affect the radio and TV. ***** has tried to find static on the radio just like in the movie "Contact." One of the examples she gave was that she got a lot of static on the radio, it fuzzed out and then the song "Don't Stop Believing" by Journey came on. After a little bit of that, the song faded out and went back to the static. She said she thought that was her "thank you." ***** believes that the lights were communicating with her.

Contrary to her comment in Case no. 17360 ("excited"), ***** informed us that none of the animals seemed to be affected. She said that the dogs didn't even bark, "in fact everything seemed suppressed. "

[redacted] asked us whether we had heard about [redacted] who resides near Van Couver, Canada. They loaned us a book, which [redacted] read, and a tape about [redacted] photographs entitled [redacted] which we both viewed. It appears that ***** feels she is experiencing something very similar to what [redacted] experiences.

Shortly after we left ***** 's house on Thursday night, she called to say that both she and [redacted] had seen a large object. ***** said it was red in color; [redacted] felt that he could also see some pink. [redacted] asked [redacted] to send in his observations, in his own words, by e-mail. We have not received that.

We have now also been informed that ^{1843(a)}₍₂₎ saw moving lights since we left. We still have to go through the pictures which we took during the skywatch.

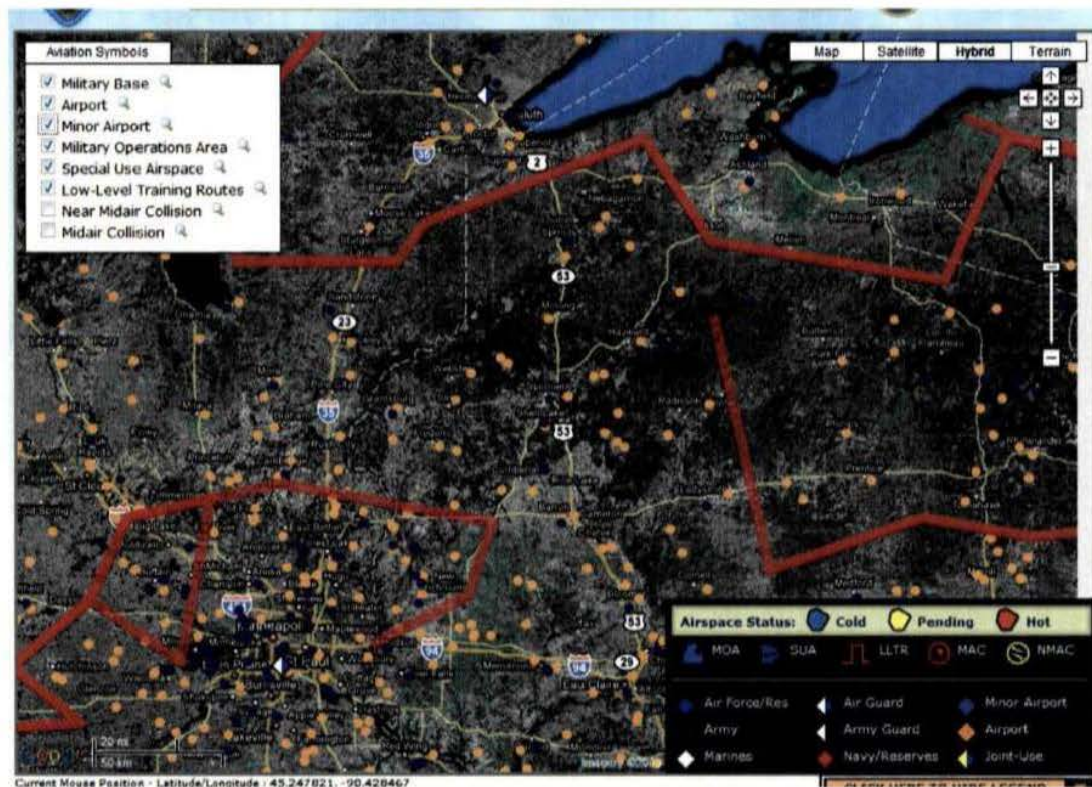

***** is very emotional and drained after these experiences. She feels that she's loosing time – and says that it's hard to explain. ^{1843(a)}₍₂₎ however, has not noticed anything in ***** that reflected a different sense of time. We have provided information regarding two potential hypnotherapists and are trying to contact another experiencer who might be willing to communicate with, and be supportive to, *****.

Case Report MUFON SIP CAT 3 Deployment

Case numbers 16818 and 16819

Field Investigators: AAP Person 113

GPS Coordinates: 1843(a)(2), 1843(a)(3)

Location: Fallon, Nevada

Date of Event: 07 May, 2009.

Time of Event: 9:30 P.M. Approximate (21:30)

On Friday May 8, 2009 a STAR team CAT 3 Deployment was activated on these cases. STAR Team Investigator AAP Person 113 was assigned as lead investigator.

AAP Person 59

MUFON (Mutual UFO Network)

STAR Team Coordinator / Manager

Background: Case numbers 16818 and 16819 were reported by two individuals who were together (in same vehicle) at time of event. Witnesses were *****
***** and ***** .

- ***** (age 18) is a High School Student and is near graduation.

*****'s father is a security officer, [REDACTED]

[REDACTED]

- ***** (age 18) is a High School graduate and is currently unemployed. *****'s mother is a [REDACTED]

[REDACTED]

Both witnesses are well-adjusted young adults and are not given to fabrication. Both witnesses are living with their respective parents and have resided in Fallon all of their lives.

Investigator Report: Investigators met with ***** and ***** at 4:15 PM (09 May, 2009) this meeting lasted until 12:45 AM (10 May, 2009).

Investigators took a break from 8:00 PM to 9:15 PM for dinner and after dinner

1843(a)(2) went with ***** and [REDACTED] in their truck to the area where the sighting first occurred and then on to the site of alleged encounter at Depp Rd, and SR-95.

Investigator noted that both witnesses appeared to still be in mild shock after this event. They were both very excitable and "babbling" at times, both talking excitedly at the same time. It was difficult to slow them down and have them talk one at a time.

The event itself occurred on 05/07/2009 around 9:18 PM. Witnesses were parked off of Sandhill Rd, near the Fallon Naval Air Station bombing range, an area frequented by couples and party goers. Witnesses were alone and no other witnesses were present. They were at GPS coordinates:

[REDACTED]

when they first saw strange lights to the east of their location.

They saw three boomerang shaped objects with five lights on each, one on the center, one on the middle of each side and one on both ends of each object. As they watched intently, one of the objects separated, shut off three lights and

appeared to be landing or crashing 50 degrees magnetic north on an azimuth of the above GPS coordinates, which would put it in the vicinity of Depp Rd (see further down report.)

***** was very emphatic and noted to investigators that he grew up in Fallon near the Naval Base area all of his life and has seen "every type" of aircraft, and these did not resemble the usual normal aircraft by any means.

***** decided to chase the objects at that time. He drove North on Sandhill Rd. 3.5 miles to Lone Tree, then went east when one of the objects (boomerang shaped) came along side to his left and began pacing their truck.

According to witness testimony, the object was about 100 yards away, and about 20 ft off of the ground. There was also an object behind them following them.

***** drove about 30 miles an hour and the object stayed alongside then he accelerated to 50 mph and the object stayed with them increasing its speed to match his. At this time ***** noted that the objects appeared to be about fifty feet across. He could not determine the thickness of the objects. ***** drove about five miles on Lone Tree to Interstate 95, crossed I-95 which became Depp Rd, drove approximately 1000 yards to a dead end, and turned around. (actually it is not a dead end, but continues on private drive to a dairy farm.) They went to about 300 yards within SR-95 and stopped. They pulled off on soft dirt next to an irrigation canal which was on the right side or the north.

GPS coordinates at this location are:

1843(a)(3)

At this time witnesses indicated there was an object behind their location (east of their location) on Depp Rd at an altitude of about 50 ft, and an object above them, at about 50 ft which was circling them. ***** noted that the main body of the craft appeared silvery, but when it banked and turned it appeared to be transparent. She remembered this because it is usually cloudy in Fallon according to both witnesses, but this night it was very clear, because she could see the stars through the hull of the craft. ***** also confirmed seeing this phenomenon.

Also ***** noted that when the object passed them, she could see two horizontal "grills" on the back of the object. Investigator questioned her further, she said, "Yeah, like the grills on a toaster or heater" meaning red glowing heating elements.

Investigator notes that the objects were shaped almost horse shoe, having two rear ends and a "grill" on each end. Also ***** noted that the object "banked like a plane would" and "made smooth movements like a plane would". They both also noted that one of the objects stayed to the rear of them at all times as if to be watching. Also it should be noted that the moon was nearing full and was up that night according to the witnesses.

At this point, ***** decided to grab his dad's spotlight and shine it on the circling object. In clarification to his original report, the spotlight was actually a **million candle power light** (not a three million candle power light) as it was examined by investigator ***** [redacted] ***** then took his hand and shaded the light off and on to "signal" the object and the object descended and approached even closer while circling above them at about 20 ft altitude. At this point in the witness's conversation, they immediately began to discuss how they were driving down SR-95 to the North and saw the object behind them. Investigators stopped them and asked to go back and review their motions and emotions step by step. It was then they realized that they could not remember what had transpired after the light was directed to the object and they began signaling it. ***** said the next thing she remembered was being afraid and jumping in the truck. ***** said he remembers doing the same and starting to turn the key in the ignition, looking over at ***** and then he can remember no more until he was traveling north on SR-95 about five miles from Depp Rd.

Investigator and Witnesses – at alleged encounter site Depp Rd near I-95

Later that evening (09 May, 2009) the investigators and witnesses went to the site and examined the truck tracks on Depp Rd. in the soft dirt. We noted that the tracks stopped on the dirt, but DID NOT continue back to the pavement. Investigator tried to get photos during the day the next day, but the tracks had been covered up as the witnesses kept driving back to the site.

Investigator made note of the fact that according to witnesses, the objects were almost completely silent except for a slight hum at all times. The lights were a bright yellow/orange.

Also noted is the fact the Depp Rd. location is near a dairy farm with several hundred head of Holstein dairy cattle, a herd of llamas, goats, dogs, etc. Both ***** and ***** noted very strongly that there was not a sound coming from any of the animals during the incident, which is uncharacteristic for farm animals at night. Usually they are very "chatty" and are constantly making sounds. Farm dogs bark almost constantly at night.

Also, since the irrigation canal is always full, there are a lot of insects, (mosquitoes, gnats, moths, etc) during this season, and that night NO insects were seen or heard during the event. They remember this because when the spotlight hit the canal and illuminated the area, there was nothing. Moths should have been attracted to the spotlight, but there were none.

They demonstrated this to investigators on evening of 09 May, 2009 when they were with witnesses at Depp Rd and SR 95 (9:45 PM). They shined the spotlight on the water of the canal and flying insects could be seen above the water and landing on top of the water. Also moths were attracted to the spotlight at that time. The witnesses are farm kids and are very well aware of nature and sounds of natural activity.

Investigator noted that ***** indicated he had an iPod and the cable for the iPod did not work prior to the incident, but for some reason it was plugged into the cigarette lighter in the truck during the event. ***** told investigator that **suddenly music began playing during the event.** After this event was over the cable was once again malfunctioning as before.

According to witness testimony, the next recollection that both ***** and ***** had was of driving North on SR 95, about three to five miles from Depp Rd. ***** looked back in the rear view mirror and the driver's side mirror and noted that one of the objects was back behind them to the south at a considerable

distance. There was a semi truck behind them, and the object was behind and above that. Then the object disappeared.

It takes about 10 to 15 minutes to go from Sandhill Rd to town. (Sandhill Rd is about 8.5 miles from Depp Rd) ***** and ***** noted that it took them an hour and twenty minutes to get back to town that night. They thought they parked on Depp Rd for only five minutes. They now think they had to have been there for at least an hour. They had originally put in their report that the event lasted for one hour, but it was one hour from the beginning of the Depp Rd. event to when they remember driving into town, so the whole event was closer to one hour and twenty minutes.

***** took ***** home and went to his house. (approximate time 11pm) They both told their parents what had happened. At first their parents thought the witnesses were joking, but then changed their minds when their children were obviously still in shock at what had just occurred. This emotional state carried over to when the witnesses met with Investigator. *****'s mom called [REDACTED] 1843(a)(2) [REDACTED] 1843(a)(2) and asked if there had been any other calls on the event. She was told there was not.

Incident Reported to Fallon Naval Air Station: *****'s dad (Mr. ***** who [REDACTED] 1843(a)(2) [REDACTED] called Fallon Naval Air Station Security (sometime after 11pm) and asked if there had been anything unusual on radar. He was told there were "three C 130s in formation" (***** said her father said that was "a crock"). Mr. ***** (confirmed to investigator) that he was told by Base Security that "There had been an "unspecified aircraft incident" in addition to the three C 130s on Radar.

Mr. ***** went back to Sandhill Rd with his son ***** that night (night of incident about an hour after the witnesses initially arrived home) and the area was being combed by military helicopters and black SUVs with dark windows. Military personnel were also combing the area on foot with flashlights. The witnesses and Mr. ***** decided not to approach the area further. The helicopters were using spotlights to examine the area from the air. This shows

possible confirmation of an “unspecified aircraft incident”. This may be the new code words used by our military in place of UFO.

Investigator later tried to talk to ***** 's father, but he did not want to discuss the event.

By the next day it seemed as if the kids were becoming reluctant to talk any further. Since we had all the information we needed, we decided to spend the rest of the time taking photos and GPS Coordinates.

Site Survey: No unusual radioactivity was noted at the alleged encounter site at Depp Rd near SR95. The Geiger counter arrived Monday around 11 AM so we had had to wait until then to take the Geiger readings at the encounter site which were within normal limits.

Newspaper Search: Investigator checked local newspaper for any reporting of the incident over a three day period, but did not find any.

Inquiry Fallon Naval Air Station: Investigator spoke with Public Affairs duty officer on 5-14-09 requesting information about “unspecified aircraft incident” that occurred at 9:30pm on May 7, 09.

Duty officer confirmed that there was an “unspecified aircraft incident” that occurred between 12 Midnight and 1AM. Investigator requested specific information about event and was referred to 1843(a)(2)

1843(a)(2)

FOIA: MUFON will be formally submitting a FOIA request to the Fallon Naval Air Station for information specific to the “unspecified aircraft incident” on the night of the event and a specific information request about the alleged security response to the area where the incident occurred.

Physical / Biological: On Saturday evening the 9th of May should be noted that Investigator suggested to both witnesses to get a black light and scan their bodies for any abnormalities.

***** did not have anything show up (Black Light scan) . ***** then noted she had three "itchy" bumps on her left leg, which she did not want to show investigator since she was wearing slacks. (embarrassed to show body area)

***** 's right forearm had several glowing areas. (Black Light scan). He scrubbed very hard twice trying to get these marks off, but they would not come off. He also noted that they were very "itchy". Investigator advised him to see a doctor if this did not go away.

Investigator asked the witnesses if they had any trouble sleeping since the incident. ***** noted that he has insomnia frequently, but that night he slept peacefully as he felt gratified by the whole event. ***** on the other hand was fearful and has had trouble sleeping since the incident, but at the same time she keeps going out with ***** who is watching and hoping for a return of the objects.

Also noteworthy is the fact that both witnesses have told all of their friends, family and acquaintances of the incident.

Investigator provided both witnesses with business card with e-mail and phone contact information in case they want to add anything further.

End of Report

Respectfully submitted,

AAP Person 113

NOT COMPLETE

Summary

- Dispatcher notes 5-26-09 - ***** ***** called back,
- Witness: doesn't know why he woke up except he felt immediate fear and compelled to go outside.
- The light was up high, large as a baseball with colored bars on all four sides (light blue on each side, red on top, blue on bottom), they did not change size or shape, object in the middle did change shape continually. Smaller objects kept going in and out of it constantly. The object was baseball size and seemed to emit some kind of energy, "like looking through a prism".
- jets all over sky, stayed in sky for over 3 hours, Object moving 3 to 4 times faster than the other jets,
- lost connection to internet during the observation,
- Object was so bright (example when you look at the sun you see spots) same thing, Witness had red patches on his arm, his chest is red and patchy, the top of his head is very red, look like red skin, not a burn,
- seemed to witness like it was only 15 – 20 minutes that he was watching this but as he thinks back at it now he first saw it about 3 am and finished at 6 am it took 3 hours but didn't seem like it missing sometime
- 2nd Witness was involved
- He did feel some dizziness, heart rate increased exactly like he had too much caffeine, at other times he was calm, other times afraid.
- He is not adverse to an investigator going to speak to him. Dispatcher: 1843(a)

Case Category 2

Report by: AAP Person 108 STAR Field Investigator

BACKGROUND INFORMATION OF THE WITNESSES:

1843(a)(2) is a laboratory director and has been living in his newly renovated 1,635 sqft. single-family home since September of 2008 along

with his fiancée ***** , a radiology technician, both have degrees in chemistry.

INTERVIEW - SEQUENCE OF EVENTS:

April 16th, 2009, approximately 03:15 AM in the morning, ***** was awakened by loud humming and she then woke up ***** to have him check out where this strange sound was coming from. ***** walked from bedroom to bedroom to look through the windows to see what was causing this humming, thinking to himself that it may be a street cleaner sweeping the area roads or some sort of utility truck working on something. He returned to the master bedroom to look through the window that was next to ***** and he noticed a very large triangular craft hovering above. The craft was totally black with no lights and from his point of view, had a boomerang shape resembling a very large "stretched out" F117 Nighthawk about 300 feet wingspan. The UFO was hovering slowly heading towards SE and took about 17 minutes to pass over their house and to fade at a distance. ***** said that the humming was very loud, constant and sounded like an electrical transformer. That Saturday, ***** mentioned to one of his neighbors [redacted] about the strange incident that occurred early Thursday morning and [redacted] did state that he heard the humming and was reluctant to continue the conversation. Upon my on-site investigation, I did notice a parked squad car belonging to Ann Arundel County PD on the same street [redacted] that belonged to an officer that resides there.

SOURCES THAT WERE CONTACTED:

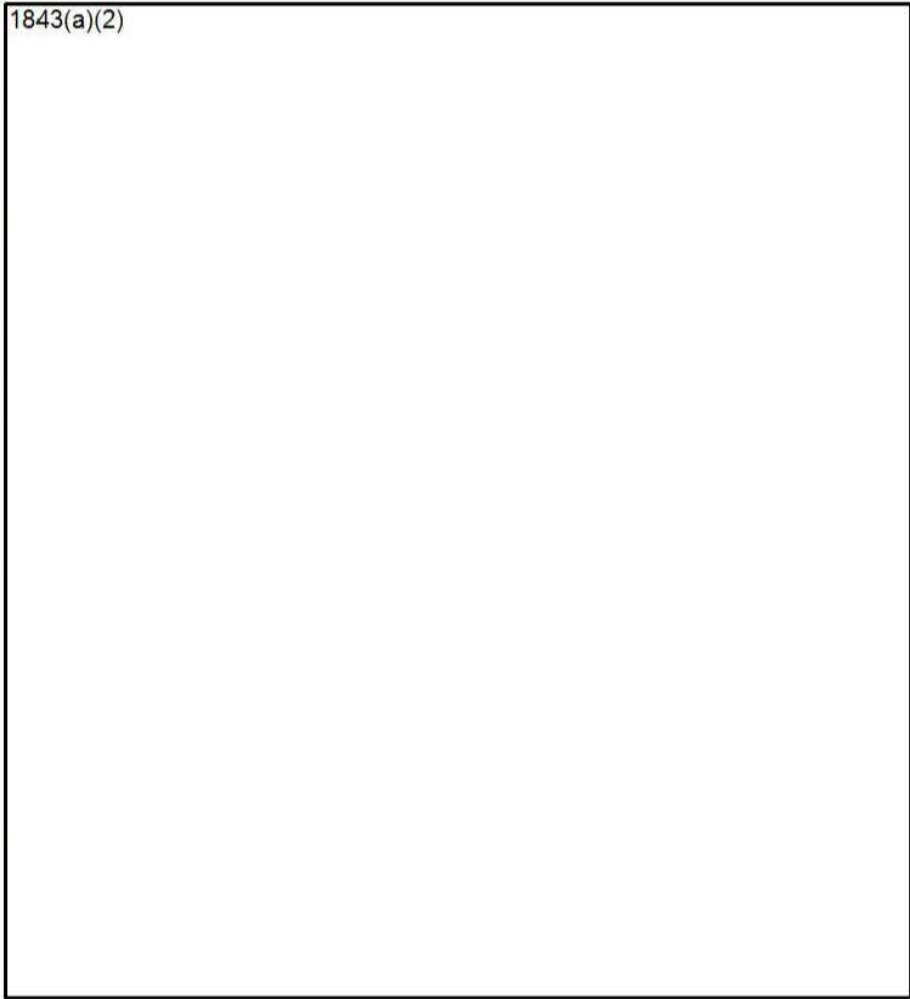

- *BWI (In process)*
- *Email 4/18: Anne Arundel County Department of Public Works, northern district (Mountain Road Yard) Citizens Info. Center [Street Sweepers]:*

Question: "Were ¹⁸⁴³(a)(2) area streets cleansed/swept on the night or early morning around 03:00am on April 16th?"

Reply from DPW 4/20: "We definitely would not sweep/clean during those hours."

- Called 4/21: 7-Eleven (24hrs) ^{1843(a)(2)}
Store attendant ^{1843(a)(2)} stated that nothing strange was heard or seen.
- Called 4/21: Exxon/Shop (24hrs) ^{1843(a)(2)}
^{1843(a)(2)} stated that nothing strange was heard or seen.
- Email 4/17: Capitol Gazette Newspaper (no replies)
- Email 4/18 and 4/23: Anne Arundel County PD Northern District (no replies).
(Note: I notice an AAPD squad car parked on ^{1843(a)(2)} upon my on site investigation; an officer resides on that same street. Second email was sent on the 23rd.)

 looking through
bedroom window where he saw triangular UFO hover above.

AAP Person
108

Artist rendition of the UAV seen by [1843(a)(2)] – Illustration by [AAP Person 108]

CONCLUSION:

***** was perplexed and a bit shaken by this incident and wondered if this was an US military aircraft, why would they built such a thing! He also stated that most of the home occupants who reside on his street are either with the military, law enforcement agencies or working as government contractors. I found [1843(a)(2)] to be very credible, logical and he really isn't into the whole sci-fi scene or the UFO phenomena.

A similar case involving a black triangular craft sans lights was witnessed five years ago in Owings Mills, Maryland, about 20 miles NNW from Pasadena, MD. February 9, 2005, [1843(a)(2)]

[1843(a)(2)] witnessed a low altitude triangle, about 500 to 800 feet above ground with no lights.

LOCATION: Grants Pass, Oregon

DATE OF EVENT: June 16, 2009

TIME OF EVENT: 10:30 pm local (Pacific Time) ☐ Exact ☒ Approximate

Event Background:

- Witness went outside to smoke a cigar and take the dog out.
- Half way through smoking the cigar he noticed "flickers" of light off in the distance in the western sky.
- Witness sees 6-10 whitish-yellow orbs and sees a crescent-like object that quickly disappears.
- As a car approached from the south end of the road, his dog was reacting to something on the other side of the road.

- As the car got closer; across the street the witness saw a pair of eyes as if an animal's eyes were reflecting in the light except they were a deep purple.
- After the car passed, the witness looked back to the spot where he saw the eyes, and was shocked to see a whitish humanoid figure stand up and walk along the neighbor's fence across the street.
- Witness got unnerved and called his wife outside to tell her what he had seen and to point out to her the continuing "light show" of orbs that were appearing and disappearing.
- She confirmed the "flickering and flashing" of orbs in multiple spots.
- Both witnesses became nervous and went into the house.

Investigator Narrative: 6/22/09

I contacted the witness by phone on 6/18/09 and set up an interview for 6/19/09 at 3:00pm PST.

I arrived in Grants Pass, Oregon on 6/19/09 at around 2:00pm PST. I met the witness and his wife at their residence. I asked permission to tape record the interview and he agreed. He began his narrative, and spoke of seeing six to ten whitish-yellowish lights/orbs the size of aspirins at arm's length, between two

tree lines. (See photos attached) He said they flashed and flickered appearing and disappearing in multiple spots but in the same general location in the western sky.

Using a compass, I verified the location of the orbs were southwest.

All the orbs were diffused, appearing in the clouds and under the cloud deck. The witness also saw a crescent shaped object about the size of a half-dollar that seemed to "thrust out of the cloud then disappear".

The witness stated, "It was a dark night".

The night of the 16th was a moonless night, for the moon had set at 2:18 pm that day. The only planet that could be seen in the southwestern sky during that time was Saturn, but it's only a magnitude of +0.9 to +1.0, and is reported as "dimmer than usual" based on the fact that Saturn's rings are currently visible "edge on".

He watched this "light display" from his front porch for about 10-15 minutes before seeing a car approaching from the south end of the road. As the car came closer, it was then that he noticed a pair of deep purple eyes from across the street. When the car passed by the witness, he looked back at the spot where he saw the eyes and was shocked to see a whitish humanoid shape stand up and quickly walk along the neighbor's yard this side of the fence. The witness said the entity's head seemed larger than the rest of the body and he could not see its feet.

NOTE: The witness said that the neighbor across the street does not occupy the house on a regular basis. The night of the 16th, the witness noticed no lights on, and assumed they were not at home.

The road between the two properties is paved higher and the ditch is not apparent from his front porch. I took pictures of the area across the street from the sighting location and measured the distance with a laser rangefinder. The distance from the witness to where the entity was sighted is 43 yards. I walked across the street and saw where the "eyes" were seen. There is a ditch that runs along the road and the fence of the neighbor's property. The ground is overrun with grass and is uneven, but is relatively flatter closer to the fence. The witness was not sure how far from the fence the entity was, only that from his perspective, the top of its head was a little higher than the fence. The fence is approximately five feet high.

The witness lost sight of the entity because a telephone pole on his property obstructed his view of it. He became unnerved by what he saw and called his wife outside to tell her about it. He also wanted confirmation from her that she could see the lights in the sky that were still continuing to flash and flicker in various spots. She said she saw them and also noticed a large red light lower in the sky that was like "turning on a flashlight". The witness saw the objects in various degrees, the highest location being 45 degrees. His wife saw the red light at about 25 degrees above the horizon.

I had the witness draw a drawing of the orbs and crescent object, and his wife added where she saw the red object. He also drew a drawing of the entity he saw. (See drawings attached)

Both the witness and his wife remained outside watching the orbs for about 10 minutes. The witness said he observed the lights/orbs for about 20 minutes total. Afterwards, while still outside, they heard a low flying jet. It was not actually seen by either one of them, but they both agreed that a jet flying that low was unusual.

The interview ran 1-1/2 hours.

The nearest military installation is Klamath Falls about 120 miles to the east. Medford International is about 30 miles to the south, and Grants Pass Airport is to the north.

On 6/22/09 I called the Grants Pass Sheriff's office to ask if there were any reports made on 6/16/09 of anything unusual seen that night. I was told no reports were logged in for anything unusual for that night and time.

Both the witness and his wife could not sleep that night. The witness said he woke up the next morning extremely drained and both had headaches that lasted a couple of days.

I found the witness and his wife down to earth people who seemed credible, sincere and intelligent. I saw no signs of fabrication of their sighting through body language or facial expression. The witness is an 1843(a)(2)
1843(a)(2) *The witness said he has had other experiences in his life.*

Animal Reaction:

The witness said it was his dog that initially saw something across the street before he actually saw the purple eyes. The dog was raising and lowering her head, staring in the direction of where the witness ultimately saw the eyes. The dog tried to edge closer to the road but ran back to the witness in fear. The dog stayed close by the witness and showed signs of fear the rest of the evening.

This concludes the investigation.

TIME OF EVENT: 10:00 p.m. () Exact (x) Approximate

On Friday May 2, 2009 a STAR team CAT 2 Deployment was activated on three cases in the ***** AZ area. Cases 16720 – 16721 – 16726 STAR Team Investigator [AAP Person 103] was assigned as lead investigator.

[AAP Person 103]

MUFON (Mutual UFO Network)
STAR Team Coordinator / Manager

Investigator Report:

5/3/09

AAP Person 103 5:30 p.m. [] talked with ***** ***** to discuss issue of getting access to possible site on Ak-Chin Indian Reservation

AAP Person 104 6:05 p.m. [] tried to reach ***** ***** by telephone. No answer, left message. [] sent e-mail to him.

AAP Person 104

5/4/09

9:00 a.m. – Tried to telephone ***** ***** again. Left message.

9:30 a.m. – Drive to Ak-Chin Indian Reservation area. Saw high voltage power lines along the way. Power lines crossed the road around mile marker 183. There was some kind of mining pit on the left as we drove South. [] went in on computer to try to obtain phone number for house by reverse address; number was unlisted. AAP Person 104

10:20 a.m. – After some difficulty locating it, we arrived at ***** residence. Before we went to the door, the witness in Case 16726 called to set up meeting time. ***** ***** also called to advise us that he had talked with a former

Director of AK-Chin Law Enforcement for Gaming Control. He obtained the name of [1843(a)(2)]

We were also informed that nothing could be picked up from the ground and that we should be very careful not to do anything which might be disrespectful to the residents of this area. We then went to the ***** residence. An older woman, who identified herself as *****'s mother, advised us that ***** , his father [1843(a)(2)] and sister [1843(a)(2)] had all gone to Colorado for a family funeral. She indicated that they had relayed information about the event to her and she was sorry that we had missed them. We left a card and asked ***** to get back to us by phone or e-mail as soon as possible (dark-colored, 2002, Honda? parked in front of house)

11:15 a.m. - Headed out in search of Police Dept., passing and stopping at Tribal Council Office.

11:45 a.m. - Left message and card at Police Department. We went back to the Casino for lunch and to await telephone call from Chief of Police.

12:50 p.m. - There was no word from the Chief of Police, so headed back to motel.

5/5/09

9:30 a.m. - Drove to ***** residence. No one answered the door. Dark-colored car in same position as day before.

10:10 a.m. - Drove to Ak-Chin Casino. Made phone calls and ate lunch.

12:00 p.m. - Drove back to ***** residence. Car in same place.

5/6/09

8:20 a.m. – Received call from [redacted] left to meet for breakfast.

AAP Person
95

9:05 a.m. – Arrived at IHOP where we met with [redacted] [redacted] and [redacted]

AAP Person
95

[redacted] We discussed the fact that we had been to the police department and were working with local people who have ties to Indian security to gain access to

AAP Person
103

Indian lands. [redacted] gave GPS Coordinates and range finder result for *****

***** case to [redacted]

10:55 a.m. – Arrived at the ***** residence and again attempted to speak with someone in the residence (we were accompanied by [redacted] There was sound emanating from the residence which we felt was either a TV or radio that was on. We drove to the Ak-Chin Casino and inquired as to whether Mrs. ***** was working. According to [redacted] he asked one of the security personnel whether or not they had heard of any unusual events and was told no. The BAASS team decided to stop at the police station en route to ***** and their interview with ***** ***** . Approximately 15 minutes after they left, [redacted] called

AAP Person
13

AAP Person
103

AAP Person
103

[redacted] to ask directions to ***** ***** ' home. [redacted] then asked [redacted] if they

AAP Person
16

were able to get in to see the police chief and was advised that they had gotten in. No other information was provided. We drove back to the ***** household

AAP Person
104

to see if [redacted] (alone this time) would have any better luck getting Mrs. ***** to come to the door. Although the dark-colored car was still there and the TV/radio was still playing, no one came to the door. We went to get gas, called *****

***** , and then drove back to the witnesses' house. At this time, [redacted] left a card and a hand-written note asking Mrs. ***** to please have ***** call us as soon as possible. Now, the TV/radio was no longer on and a package of cigarettes had been removed from a table outside of the door. The Honda was still in front of the house.

AAP Person
104

3:30 p.m. – Unable to get any further without a witness, we started back to *****.

4:30 p.m. – Arrived back at motel. Started writing reports of daily events.

Contacted [redacted] about continuing inability to contact witness.

5/7/09

10:00 a.m. – Once again drove out to the ***** home.

10:35 a.m. - As we approached the home this time, we noticed that the dark-colored car was gone and a red truck and another car were parked near the home. [redacted] came out of the door and approached us as we walked up the driveway to the home. [redacted] indicated that they had just gotten home and invited us in. ***** was in the shower but came out a few minutes later. Both [redacted] and ***** agreed to sign both release forms.

We asked ***** to give a narrative of what he saw as we video taped him.

1843(a)(2) ***** said it was too bad that his sister, [redacted] wasn't there as she saw what they saw (later we asked ***** to send his sister an e-mail and ask her to send us her recollections from the sighting).

We asked ***** to start relating his experience by starting with what was going on right before the sighting. He said that the first time he saw the light, he was coming

home from getting some food and saw the light sitting in the sky. It was similar to lights he had seen on other side of the mountain (but never saw on this side.) He went home.

***** said that his father 1843(a)(2) was on the couch and called ***** in to go out and watch the event that was going to happen that night with the moon and Venus. ***** said he saw the moon but not Venus. What he did see was an amber colored ("like sodium vapor street lights") light, but that it appeared much larger than a street light and it "was dimming and coming back bright" so he ran in and called his dad to come out. 1843(a)(2) looked and he noticed the light too. Then the light started to reappear in different areas and then he saw more, smaller lights that seemed as if they were coming from the original light source. ***** then ran in to get his sister and he states that she saw the same thing.

1843(a)(2) and at some point decided to go back into the house. 1843(a)(2) and ***** continued to watch; in fact 1843(a)(2) got on the roof of the red truck in order to see better. ***** told her to get down and that they would drive south. They headed to the Ak-Chin Casino. As one faces the Casino from the road, the area where they saw the lights would be in back and to the right of the Casino. ***** estimated the lights to be about a mile behind the casino (see Google picture which is included). He thought that the lights were spaced about a 100 yards from each other. Some of the lights looked like emergency type lights ("orange....pulsating lights") but he did not see any vehicles. ***** made a U-turn at the Casino and the lights were still there. Since there was no way to get back onto the reservations property, ***** and 1843(a)(2) went home. The lights were still there when they left. When they got home, they couldn't see anything. ***** said that amber lights have been showing up everywhere in this area but prior to this time, appeared to be on the mountain. 1843(a)(2) added that those lights stayed in the same spot and as they moved they lost sight of the lights.

***** has no hearing or visual problems. 1843(a)(2) does wear glasses and was wearing glasses at the time but then took them off. 1843(a)(2) says that he can still see road signs at a distance better than ***** can. 1843(a)(2) also said that he has had more experience with lights because he was in the Navy. He said that he knows that there is a difference if you look at something directly vs. seeing something in the periphery of your vision. He did admit, however, that he does

not have a good sense of direction. He looked at the lights and tried to calculate their distance and felt they were much further away than ***** did. [] felt 1843(a)(2) that the lights were 10-12 miles away from where they were standing. He said the lights moved around and while they were somewhat like streetlights "they seemed brighter and mellower at the same time." They were totally round.

***** said that when he first saw one, he could think of something that would make that kind of light but you could see one, and then one might appear to the left, and then one might appear to the right - and this happened three times.

1843(a)(2) Spatially, [] felt that the lights were hundreds of feet apart. He felt that they definitely were distinguishable from a helicopter. He thought that some of the lights were smaller, sharper and moving around the other lights so felt that they

1843(a)(2) were faster. [] tried to determine a trajectory but had no reference points to do so in the dark.

1843(a)(2) [] stated that they sometimes sit out and night and he'll see lights and say "that's a plane." In this case, when he looked at the lights he said "wait a minute, 1843(a)(2) that's different." [] said that he was emotionally stunned to see something "I

haven't seen in all of my years.... my mouth was open." [] said that he 1843(a)(2) rationalizes things and this event he couldn't rationalize. His first inclination was to say that these were flares like the ones they have seen at Gila Bend Air Force.

1843(a)(2) However, [] was in the Navy and on the Kitty Hawk Aircraft Carrier from 1970-1972 and also managed some businesses in Pendleton. He has seen flares many, many times...and knows what they look like.

***** said he was shocked. When he was 7-8 years old ('91 or' 92) and was living in Las Vegas, he was looking directly west and saw the "weirdest craft." It did not look like an airplane. He didn't know about the stealth aircraft at that time but now he thinks it looked like a bronze-colored stealth. He ran in and told his mother but no one believed him. ***** said that he had filed a report on that with MUFON.

We then went out to the front yard so that [] could take pictures, use the range finder and get the GPS coordinates. The distance from where [] was standing to the top of the roof of the house down the street where the light was sighted was 187 feet, with a 13.8 degrees angle. 1843(a)(2)

1843(a)(2) [] said that when he originally stood on the lawn and looked up at the sky, he couldn't see anything. He then walked back, closer to the house, which was about 2 feet higher in elevation. Then he could see the light between the second and third house (on the street which is perpendicular to [] in the very low sky, appearing just a foot above the rooftop. He said that it did move a little but not much above that height. 1843(a)(2)

1843(a)(2) At this point, [] went back into the house and ***** rode in our car with us to the actual place on the Ak-Chin Reservation where he saw the lights. He didn't see any lights on the way the night of the event. He said that they made a U-turn at the Casino and they saw the lights on or near a berm. They then slowed down (we parked our car there to allow [] to take pictures.) There was a larger light right in the middle – a" light like could have been on an airplane but it was pulsing." ***** pointed towards a red-colored building as the approximate direction where he saw the lights. There were red/ orange and yellow emergency type lights; he thought that there were two on the left and one on right. There were smaller lights just sitting there pulsating or flashing. ***** assumed that there were vehicles there but didn't actually see any. AAP Person 103

1843(a)(2) He and [] then drove home. ***** does not know of anyone else that saw anything that night. ***** thought it was about 10:30 p.m. when they arrived home and they reported the sighting within perhaps 20 minutes.

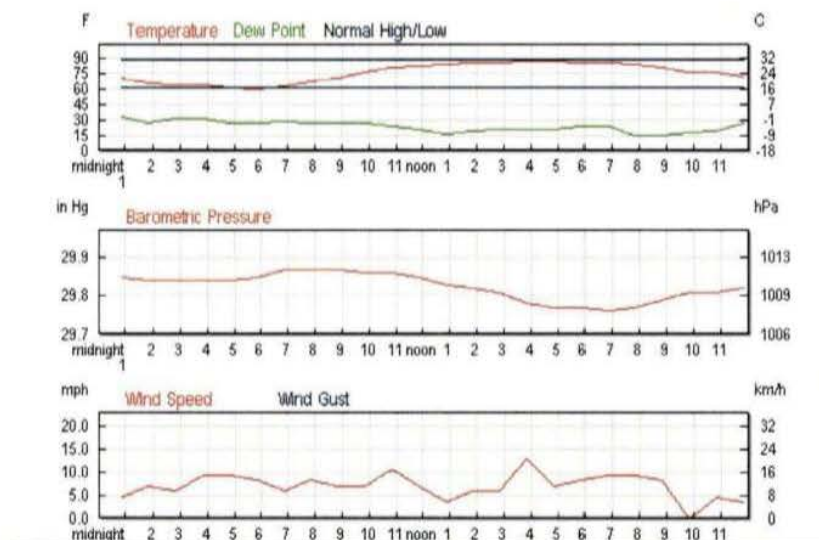

After the event, ***** went on Google Earth and felt that the lights were near the Estrella Mountain area.

After ***** showed us where he saw the lights, we drove to the police department to tell them that we now had the actual witness with us and that we knew where the lights were sighted. As we drove along the side road we looked at the area where ***** thought he saw the lights. We saw tractor tracks in the dry dirt but did not see any evidence that a number of vehicles had gone to a particular area. The clerk at the police department suggested that we go over to the Tribal Council's office to let them know – which we did.

We drove back to ***** 's house and dropped him off.

1:00 p.m. – Drove back to motel in *****.

DATE OF EVENT: 4/28/09

TIME OF EVENT: 9:45 p.m. () Exact (X) Approximate

On Friday May 2, 2009 a STAR team CAT 2 Deployment was activated on three cases in the ***** AZ area. Cases 16720 – 16721 – 16726 STAR Team Investigator AAP Person 103 was assigned as lead investigator.

AAP Person 59

MUFON (Mutual UFO Network)
STAR Team Coordinator / Manager

Investigator Report:

5/3/09

AAP Person
104

6:30 p.m. – [] called ***** to try to set up meeting time. ***** was uncertain of when she will be available; to call again.

5/4/09

12:55 p.m. – Called ***** ; unable to set anything firm as she is waiting for doctor to call her to come in. To check back with her in a.m.

5/5/09

9:00 a.m. – Telephone message left on ***** 's tape.

5:00 p.m. – Travel to [1843(a)(3)] t/c to ***** .

5:45 p.m. – 6:20 p.m. Met with ***** and son, ***** , at site. Obtained signature on both release forms. Checked driver's license.

***** noticed some lights before she went into a store on Olive Street. When she came out of the store about 5 minutes later, three lights were in the same spot and hovering. She crossed the street to where there is an open field. Although Olive Street can be quite busy during the day, it was about 9:45 p.m. and the traffic was light. As we approached the spot where she stood to watch, ***** immediately pointed out a tall palm tree saying " it was about there."

When asked what drew her attention to the lights, ***** said that there were three lights above the skyline and that they were similar in color to the amber

1843(a)(2)

color of streetlights. It seemed odd because the lights were stationary, not moving left or right. She felt sure it wasn't a helicopter because it was far too big for that. She also noticed that the lights were pulsating "slightly." The lights weren't high, being just above the horizon and didn't seem normal. She waited and watched to see if they would move. Eventually, she tried to get her son, [REDACTED] on the phone but he couldn't see the lights because of the trees at his location. At the edge of the field where she stood, however, there was nothing obstructing her view. ***** knows the general area, and said that it was near Estrella Mountain peak. She knew it wasn't South Mt. and it was only 5-10 degrees off of the ground. It just was there. She thought she might have seen a glimmer of a red light but didn't seem certain. She said that the middle light flickered and then went out...then the other two went out. *****'s family is "into aircraft" and technology. They watch the skies and have attended air shows for many years. She said that this wasn't something usual that you would see in aircraft around this area and it was too large to be anything routine. She saw a normal size plane and it was dwarfed in comparison to these lights.

***** commented on Goldwater Military Range where they do testing but that's off of the reservation area. She also said that some people have seen flares.

***** was quite confident in stating "I've seen flares...these didn't have the behavior of flares...even in their alignment, and there was no trailing smoke." She said that it had to be three lights on one craft or three crafts traveling together. They were in the exact same spot minutes after she first saw it. She stared at it.

When questioned about her eyesight, ***** said that she wears glasses and was wearing them that night. She's nearsighted with no other visual impairments. She did say that her eyes are "extremely sensitive to light because I'm so fair" and she was wearing large sunglasses over her regular glasses when we met.

Relative to her hearing, ***** said that she does not have any hearing problems and she heard nothing related to this event.

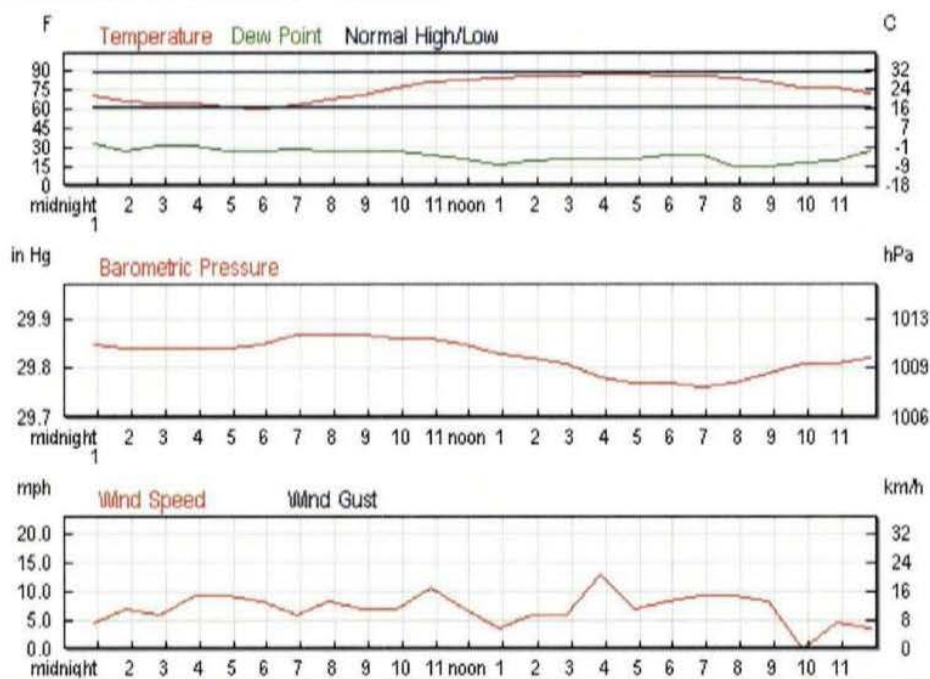

Regarding the sky on that evening, ***** said there was a "little bit of light covering ...nothing major...moon not bright or light enough to see anything." It was clear without much humidity. When asked about the size of the object if she held her hand out in front of herself, ***** said the object would be about an inch wide across the three different lights. She didn't see a craft or form or object. She didn't see anything land. She saw three distinct lights, pulsating. There were no other pulsating lights.

***** said that she doesn't know of anyone else who saw the lights. She did call the police. They didn't want to take her report but they did come out to her house about an hour later. ***** said that she is not seeking publicity or anything like that but she understands "how important it is to figure trajectories" and she realizes that data is important.

Luke Air Force is nearby, as is Goldwater Military Range. ***** said that they do train at Goldwater but that they are aware of those craft. She also advised that they make Apaches in AZ. When asked about any nuclear power plants, ***** said that there is a plant which is quite far away as you are going out of town. There is a smaller substation. Not much is out there in the area that she saw the lights; there are farms, and housing, no mining- mostly Indian reservation land. ***** didn't know what Indian nation resided there but knew that Ak-Chin was "right over there." She said that it's a very different community and if you have a weapon they can arrest you.

The distance from the site where ***** stood to the palm tree was 1,348 feet. The field is an acre, with each side being 1/4 mile in length, according to ***** .

AAP Person 59

10:45 a.m. - Arrived at Ak-Chin Casino and spoke with ***** ***** on the telephone re plans to meet witnesses in 16726.

11:00 a.m. – Update

AAP Person 59

by telephone.

3:40 p.m. – Left for meeting with witnesses in Marana. Noticed big power plant about 17 miles before the Cortero exit.

5:20 p.m. – Arrived at home of Case 16726 witnesses, referred to here as “Husband” and “Wife.” Husband is a retired police officer and Wife previously worked for the same police department. Husband has a back injury and is in a considerable amount of pain much of the time. He adamantly denies using any pain medications other than things similar to aspirin. Wife has problems with her neck. They lead a quiet life.

Husband went out on the porch to let their dog out at 9:05 p.m. on 4/28/09. When he went out the door, he noticed 3 lights in the shape of “perfect” triangle – with each point having a bright white light. The lights flashed in synch, approximately every second. Husband feels that they were about one mile away. The distance between his porch and

the neighbor's house, obtained with a range finder, was 174 feet. The GPS coordinates are 1843(a)(2), 1843(a)(3) The object was just about at the height of the moon. No stars or other objects could be seen between the three lights even with binoculars; witness therefore feels that it was a solid object. The object appeared to be very large, about the size of a football field. Husband is a football fan and is well-acquainted with the size of a football field; he therefore felt comfortable in reporting that as its size. Husband could see the object right over the top of the house next door. He said it was just left of the center of roof, past the rim of the hills.

Husband banged on the sliding door of the house to get Wife's attention. He motioned her forward with his arm so that he did not have to turn and lose sight of the object. Wife didn't comment much on the event but she did confirm the sighting and said they were "amazed."

Husband said that he felt a little "goofy" relating this to us but also added that he "all of a sudden was back on the job," using his powers of observation so that he would be able to accurately describe what he saw. He also drew a picture for us prior to our arrival.

As Wife was coming out onto the porch, the lights started changing formation and moving towards the northwest. They went into a straight line and then into what Husband referred to as a backwards "C," adding 4-5 more lights. To illustrate this form, Husband held up both hands, using his thumbs and pointer fingers to form a triangle. He then rotated his hands so that the top of the triangle came down. He said that it was his impression that the object turned down as opposed to something that was completely breaking up, but admitted that he was not sure.

Husband then described how the lights would come on and off again. He described the lights going on and off in a "violent" manner. Three lights might go on then "bang" there were two, then three, then two. He said that at this time he got a "scary" feeling because it seemed "synchronized, as if it was one."

The usual flight pattern from Tucson is from North to South, and the planes fly just behind Sombrero Mountain. On the evening of the event, the object was in that area moving towards the northwest so that a plane flying the usual pattern might cross paths with the object. At the end of the event, Husband saw a plane which flew east of the flight pattern, so that it would go right over the couple's house. He wondered whether the plane might have changed its path in order to avoid the course the object was on. Husband said that the entire event may have taken longer than he originally reported – possibly as long as 10 minutes. There was no sound associated with this event.

Husband tried to contact Marana Airport and KOLD news site; he could not obtain any information about the sighting.

In addition to the information submitted on CMS, the next night (and on a couple of subsequent nights) Husband noticed two identical helicopters flying about a 5-mile radius which included an area over the Sombrero Mountain area, hour and after hour. This is seen only at night and according to our witnesses there is nothing there (other than a mine and cotton fields). Husband did see a helicopter cockpit fully lit up.

7:00 p.m. – We spoke very briefly (she was just about ready to drive away) with the Witnesses' neighbor who does not want her name or contact information made available to anyone else. At about 9 p.m. that same night, Neighbor was talking on the telephone and looking at the moon at the same time. Neighbor

said that it was a 1/3 or a crescent moon. What drew her attention was that she saw lights that seemed to her like sparklers – like her uncle used to light for her. She said that it was really pretty like the 4th of July. She did not feel there was any pattern to the lights but that they were “all over the place under the moon.” She started talking on the telephone again, and then the lights went away. Next, she saw them to the right of their original position and then they seemed to form a backwards C shape; after that she “lost it.” She didn’t hear any noise associated with the sighting. It seemed as though this witnesses was distracted from observing the lights closely by her telephone conversations. Neighbor advised us that the mine is located at Picture Rock on the other side of the mountain.

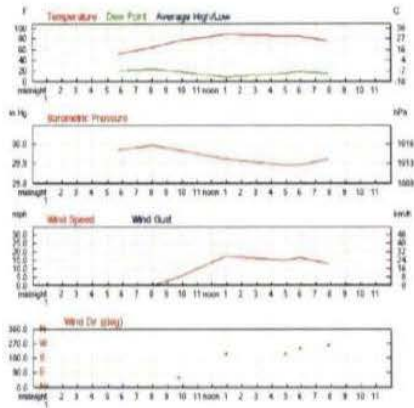

7:30 p.m. – Left to find a quiet area to watch the sky in hopes that we might see a helicopter. Sat for awhile at intersection of Pima Farm and Scenic Drive. Left after AAP Person 59 advised us to go back to our motel. Spoke briefly on the telephone with 1843(a)(2) (acquaintance of Husband) who did not have a sighting at the same time. He did confirm, however, that on the night of 5/3/09, he saw black helicopters in the air near his home between 8:30 p.m. – 9:00 p.m.

9:50 p.m. – Arrived back at motel.

5/5/09

8:00 a.m. – Sent thank you note via e-mail to primary witnesses.

MUFON (Mutual UFO Network)

STAR Team Coordinator / Manager

Note: Witness has signed a release for her personal information to be relayed to BAASS but does not want same posted on CMS, including GPS Coordinates)

Investigator Report:

6/19/09

Talked with AAP Person 59 and 1843(a)(2). Obtained Google Earth photo of area and contacted witness by telephone to arrange meeting.

6/20/09

9:30 a.m. – 2:00 p.m. Investigators traveled to Poynette, WI to meet with the witness, 1843(a)(2). Obtained signature on form to release personal information to BAASS (no further release without written authorization). Interviewed witness. Obtained GPS coordinates, checked radiation levels (normal) in driveway and on car tarp removed from vehicle which had been in the driveway, checked for magnetic anomalies around shed, obtained distances with

laser range finder (driveway which faces south = 415 feet long). Verified sensor light on garage facing south and up (range set for 30 feet). Multiple calls to State Director and AAP Person 59

***** (DOB 8/10/58) lives in a very nice home which is about 200 feet from a river with her fiancée, *****, who is currently in Pakistan. ***** was the one that suggested that ***** contact MUFON. ***** worked as a deputy sheriff from 1976 until she retired in 1987. She volunteers as a German Shepherd rescuer and currently has seven dogs in her care. She also trains dogs for service work with the disabled. A friend of ***** was at the home, sleeping on a lower floor at the time of the incident but was not aware of anything.

***** allowed us to audio-tape her interview but does not want the tape released without further authorization. She authorized us to release her personal information to BAASS but again, did not want BAASS to release that information to any other individual or organization without her express written authorization.

***** says that she has "not a clue" what she saw. She describes herself as open minded -she says she is not a skeptic and not a believer. On the morning of June 18, 2009, ***** got all of the dogs settled and went to bed at about 12:30 a.m. and was just falling off to sleep. She heard a hovering noise - something sort of like a helicopter, but different, that awoke her. She is familiar with the sound of a med-vac helicopter but said this object had a lower volume. It was a low hum but it was not as deep in tone as our sample and was not cyclic.

Two of the dogs that were with her were quiet but had gotten up and gone to the window. She was in the master bedroom on the second floor, which faces the road. The drapes were closed. Her first thought was "what idiot is out in the driveway" as that had happened before. The noise seemed to be getting louder as she went into the bathroom where she could see better. There is one small, low-voltage light in the driveway and then next to that is a motion sensor. She saw that the motion sensor light was on. It had rained the night before but she didn't see any animals or car tracks in the driveway to explain the fact that the motion sensor was on. The motion sensor works at about 30 feet and is not super sensitive.

She then looked up and thought "what in God's name is that?" She saw 3 white lights moving in a straight line up her driveway; they were "perfectly spaced, perfectly linear." She initially thought of Orion's belt but the spacing was far bigger. There was also a red/white flashing light that was on the left hand rear side – at about a 45 degree angle to the last of the three white lights. There was no circular pattern to the lights; they were "pretty bright, like an LED plus that illuminated the driveway." She saw no reflection and didn't see any edges. Her impression of what she could see was that it was a flat bottom of something rather than a side and it appeared dark gray or metallic. Recalling her "radar speed days," ***** estimates that the lights moved at about 30 miles an hour. The object wasn't floating or coasting; it wasn't swaying or jerky. There was no deviation from the pathway at all; ***** therefore discounted a helicopter or blimp. The lights were not like those seen on a plane. The object was moving straight forward, like a machine that was driving south towards the highway. It didn't increase in speed or noise. She could see that the middle light was over the telephone lines so she estimated that the object was approximately 300 – 375 feet long. The object was about 50-75 feet above the tree line (tree height measured with a range finder at 80-89 feet), definitely lower than what she would consider a safe flight pattern. She felt the distance between the white lights was 90 to 100 feet apart, starting with the first light being in about 10 feet. She assumes that the lights were attached because they never moved. She felt that the red/white (red-white-red-white = no blips in combination) light also was attached to the vehicle (as opposed to her written report). The incident lasted about 3 minutes.

***** wears reading glasses but sees distant objects fine without them. She did not have her glasses on at the time of the sighting. Her hearing is normal and she is in good health. She denies the use of any medications that would impair her state of mind or ability to recognize objects.

Regarding her emotions at the time, ***** referred to her training as a deputy sheriff and her desire to identify and document the object. She looked at the clock in her bathroom and it was exactly 12:54 a.m. She wasn't afraid or anxious but she did feel in awe and wanted to know what she was seeing. She has never seen anything like this before.

AAP Person
59

When asked about her emotions after the event, ***** said that she has been shot at so this didn't seem scary to her. She thought to herself "well this is weird, this is kind of cool." She was, however, very impressed at the size of the object and kept looking to see if she could see anything going up. She decided that she needed to consult with [redacted] in the morning and went back to sleep. ***** stated that she doesn't get rattled easily. Everyone comes to her when they have a problem because she has a lot of common sense.

Military installations: In Baraboo, there is an old ammo dump, Fort McCoy, Camp Douglas but none are particularly close. They do get F-16s flying over for maneuvers and National Guard choppers which ***** is familiar with.

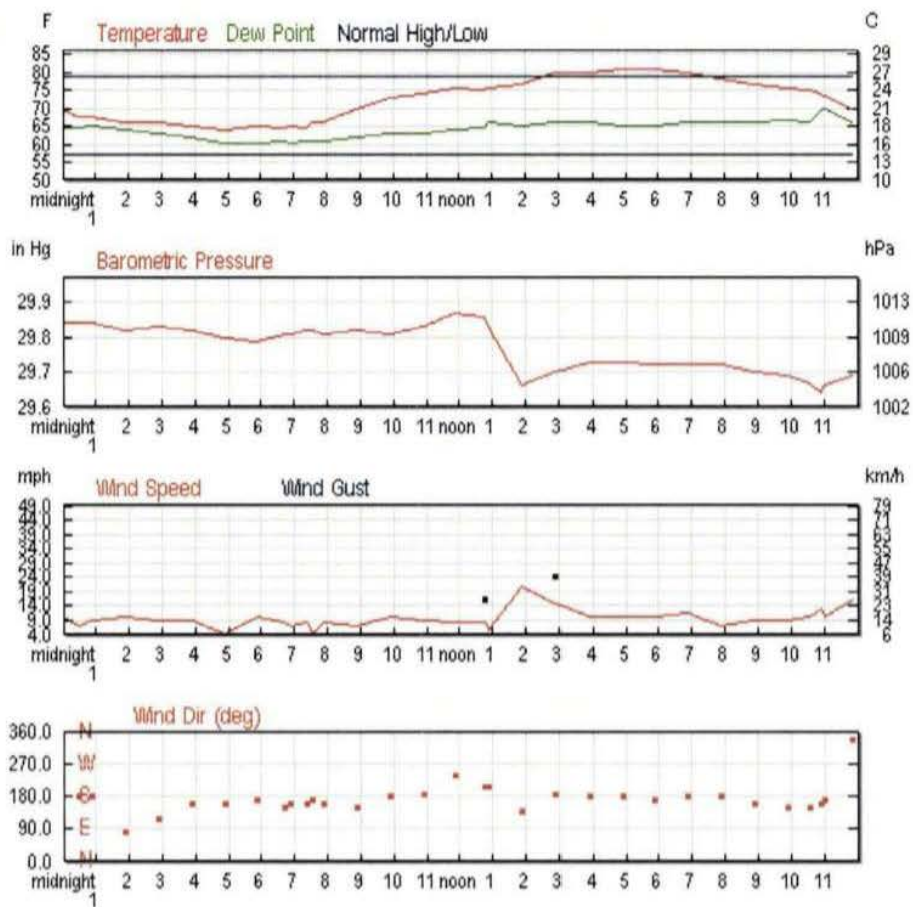

Power Plants: Portage has a power plant 20 minutes NW of *****'s location; there are no large power lines that run close to her. They are putting in a new utility district on Smith Road.

6/21/09

1:00 p.m. – 5:15 p.m. Sent e-mail to County Sheriff re sighting and MUFON contact info for future reports. Called witness and played sample sound for her to compare to what she heard. Spoke with [redacted] and completed report. Sent thank you note to witness. Sent FOIA to FAA.

Weather report: Visibility < 6Miles

1843(a)(2)

BAASS Deployment to Brazil

Beginning at the end of June, and spanning early June, several BAASS personnel were deployed to Brazil. The purpose of the deployment was two-fold: (a) a team was dispatched to the South of Brazil to meet with multiple organizations and individuals in Sao Paolo and Brasilia who were considered important future contacts for BAASS and (b) a team was dispatched to Fortaleza (Northern Brazil) to investigate recent reports of UAP activity in the Itatira region in Ceara County. It should be emphasized that BAASS deployed in a very low key way with specific instructions to maintain a very low profile and they were also instructed to mitigate and dampen all media inquiries. BAASS personnel were in possession of pre-approved talking points and limited information to give to all groups and individuals in Brazil. BAASS personnel were under strict instructions not to draw attention to the organization or its membership. Enclosed is the Northern team.

Synopsis:

AAP Person
32

On May 25, 2009 the north team comprised of AAP Person 11 and 1843(a)(2) AAP Person 31 and I deployed to Brazil. The mission was to meet with the established contacts and interview as many witnesses to the UAP phenomena as possible. The team was able to meet with the leaders of the CPU and CSPU and a public officer for the municipality of Itatira. While the trip also included interviews with additional witnesses supplied through a reporter identified as 1843(a)(2) those contacts were not made as a result of her absence or failure to cooperate. An interview with 1843(a)(2) was also scheduled; however, due to his lack of cooperation the interview never took place. The north team's focus shifted to acquiring as much documentation as possible from each of the ufologist groups. The north team secured approximately 70+GB of information to include video, investigative reports and photographs.

Narrative:

AAP Person 11 On May 25, 2009 the north team comprised of Senior Investigator AAP Person 11 Translator AAP Person 32 Translator AAP Person 31 and I traveled to Brazil to meet with local ufologist groups in an attempt to gather as much information and conduct interviews of eye witnesses to recent UAP activity.

On May 26, 2009 the north team arrived in Fortaleza. Contact was made with 1843(a)(2) to announce our arrival and confirm the meeting time and location. 1843(a)(2) advised that he would meet us at the hotel in the morning and spend the day with us at the CPU headquarters. Contact was made with 1843(a)(2) to announce our arrival; however, due to her position as a reporter with the O POVO Newspaper we did not give her our location. 1843(a)(2) agreed to meet with AAP Person 11 and me on Thursday the 28th. Attempts were made to contact 1843(a)(2) to announce our arrival and confirm the meeting with him; however, his phone had been disconnected.

On May 27, 2009 1843(a)(2) and two of his colleagues later identified as 1843(a)(2) and 1843(a)(2) met us at the hotel and then escorted us to the CPU headquarters. Upon arriving at the CPU headquarters the team was introduced to another male adult identified as 1843(a)(2) all of which are members of the CPU.

The team spent the entire day with 1843(a)(2) and the CPU group. 1843(a)(2) allowed the team to take photographs of some of the paraphernalia he had acquired through some of his investigations. Due to the language barrier AAP Person 31 and 1843(a)(2) talked more in-depth with the group about the recent events in the State of Ceara. AAP Person 32

One of the recent incidents that occurred in the Corrego do Salgado area, which was investigated by 1843(a)(2) and 1843(a)(2) was an incident involving three young boys where a "Frisbee" shaped object landed and two "Beings" 1843(a)(2) exited the object and assaulted one of the boys named 1843(a)(2). Both 1843(a)(2) and 1843(a)(2) agreed that the statements given by the three boys were inconsistent and they thought it appeared to be an incident of abuse or related to a fishing accident, due to the family being in the fishing industry.

Apparently 1843(a)(2) and 1843(a)(2) spent some time in the Colares area with 1843(a)(2) however they would not go into much detail. 1843(a)(2) did 1843(a)(2) state that he has seen objects in the Belem Region between the time frames of 2001 and 2007 and believes Colares is still happening and people are just not reporting it because of the community's acceptance to the activity. 1843(a)(2) told us 1843(a)(2) he would write us a statement of all his recent sightings in the Colares area and send it to us.

With the permission from [1843(a)(2)] the team continued to take photographs of various types of objects to include: some type of chip taken out of a human, which was planted by an "alien", meteors, angle hair, burned rocks taken from landing sites, metal fragments taken from a crash site and dirt samples taken from landing sites. The CPU group also opened several cases they investigated in reference to abductions and injuries people had sustained as a result of the encounters they had experienced with UAPs. The information was so overwhelming that it was a task just to keep up; however, at the conclusion of the day [1843(a)(2)] told us that we could have copies of all his work to include some 3418 case files.

1843(a)(2)

Due to the time constraints and the other meeting established with [1843(a)(2)] I informed [1843(a)(2)] that we would return on Saturday May 30th to start copying his files after we returned from Sobral. (Supplemental Report to follow from interviews conducted by AAP Person 31 and AAP Person 32)

AAP Person
11

On May 28, 2009 Investigator [1843(a)(2)] and I were to meet with [1843(a)(2)] [1843(a)(2)] is a news reporter for the O POVO Newspaper. Prior to the trip and upon arrival in Fortaleza she agreed to meet with us and provide witness location. She would not release that information without having a face to face interview with us. [1843(a)(2)] was a no-show and would not return our attempts to contact her which included, calls made to her cell phone, office phone and the messages we left at the newspaper for her.

The meeting scheduled with [1843(a)(2)] had the same result, which altered the team's itinerary. Due to the meeting established with [1843(a)(2)] at 1200 hours and her not responding to our attempts to locate, the team prepared for the trip to Sobral in the morning.

On May 29, 2009 the team traveled to Sobral. Upon arriving in Sobral the team met with [1843(a)(2)] and [1843(a)(2)] who is also a member of the CSPU. [1843(a)(2)] took us to a local restaurant where we met an additional CSPU member later identified as [1843(a)(2)] After having lunch with the members of the CSPU, [1843(a)(2)] escorted us to the hotel he had set up to accommodate us while we were in Sobral.

About 1630 hours [1843(a)(2)] returned to the hotel to escort us to the conference. Upon arriving at the conference, it was clear that we were the center of the night. I noticed what appeared to be a television camera crew set up as well as a reported from a local radio station filming and recording the entire night. During the conference several people stood up and talked about incidents with UAP's that affected them and their lives to include abductions.

At the conclusion of the night, [1843(a)(2)] gave us a copy of the CSPU's investigations for the past two years. [1843(a)(2)] and members of the CSPU accompanied us to dinner where [] talked in depth with one of the members identified as [1843(a)(2)] who claimed to have been abducted and now has special powers to include the ability to communicate and write in "alien". (Supplemental reports of witness interviews to follow from [AAP Person 31])

Files obtained from Sobral, Brazil:

Sobral CD – 252 MB

- Given to [AAP Person 31] on May 22, 2009 by [1843(a)(2)] and [1843(a)(2)] after CSPU Meeting
- This CD-R contains 56 files
 - 1 Word document
 - 55 .cdr (image files)
- 1 Word Document has 13 pages of cases:
 - About a paragraph regarding each case with dates ranging from 1992-2009
 - Cases blurb very similar to GEIPAN Summary of case, it usually has a time, date, event description, and sometimes contact information.

- Cases are titled usually by the name of the witness:

1. [1843(a)(2)] - 8/10/1997
2. [1843(a)(2)] - 02/11/1999
3. [1843(a)(2)] - researched 06/01/2000
4. [1843(a)(2)] occurred in Nov./1999
researched 06/01/2000
5. [1843(a)(2)] - 25/11/1997
6. [1843(a)(2)] - researched 14/12/1998
7. [1843(a)(2)] - occurred 20/11/1998
researched 16/12/1998
8. [1843(a)(2)] - 24/05/1999
9. [1843(a)(2)] - July/1992 report
gathered in July/2000
10. [1843(a)(2)] - 12/06/2001
11. [1843(a)(2)] - 13/06/2000
12. [1843(a)(2)] - 26/02/1999
13. [1843(a)(2)] - weekend in
April/1997
14. [1843(a)(2)] - 1990/1998 Report
gathered 24/04/1999
15. [1843(a)(2)] - 15/06/2001
16. [1843(a)(2)] - Mid-August 2008
17. [1843(a)(2)]
[1843(a)(2)] 3/12/2008

18. [REDACTED] - a Friday of
November 1992

19. [REDACTED]
24/05/2009 [REDACTED]

- 55 .CDR Files (Image files)
 - For the moment these files have not been able to be opened on BAASS computers
 - Each file varies in size
 - Preliminary analysis: They are bi-weekly reports on regarding cases the CSPU is or has investigated
 - Possible content:
 - Images
 - Name of the team of ufologist who did the research
 - Details of their research
 - Files are labeled as Edition #, 1st or 2nd fortnight of Month and year
 - These files date back to the second fortnight of December 2006
 - The most current edition being the second fortnight of July 2008
 - The files are:
 - 1. Edição 46, 2ª Quinzena de Dezembro de 2006.cdr

AAP Person 31 On May 30, 2009 the team traveled back to Fortaleza. During our travel [redacted] was able to make contact with the public officer in Cacheira later identified as [redacted] 1843(a)(2). [redacted] 1843(a)(2) conducted several UAP sightings in the Itatira region and agreed to meet with us on Sunday May 31, 2009. Upon arriving in Fortaleza [redacted] and [redacted] AAP Person 11 returned to the hotel and attempted to make contact with [redacted] 1843(a)(2) and [redacted] 1843(a)(2) which was still unsuccessful. [redacted] AAP Person 31 and I returned to the CPU headquarters and started the process of copying [redacted] 1843(a)(2) files.

On May 31, 2009, AAP Person 11 and [redacted] returned to the CPU headquarters and spent the day scanning [redacted] case files. [redacted] and I traveled to Cachoeira to meet with [redacted]. Upon arriving we met with [redacted] who had already prepared a DVD for us, apparently with all the cases he had investigated in the Itatira Region.

In speaking with [redacted] he told us that he as well as his neighbors has seen lights, but had no photographs of them. He stated that he has spoken to several people that have seen objects and lights in the sky. [redacted] stated that he believes that there is an earthly explanation for all the sightings and thinks that maybe there is a connection to the nearby "uranium mine". [redacted] stated that the sightings are really prevalent when the mine is open and being worked. [redacted] stated the best time to see a UAP is when the weather is clear and not in the rainy season. [redacted] stated the best time to witness a UAP is between July and November.

[redacted] agreed to take us to see some of the witnesses. We traveled to a small town identified as Lagoa do Mato, where we picked up a teenage boy. The boy led us to one of the witnesses identified as [redacted] who is an 18 year old female that witnessed a UAP near her residence just outside of the town. [redacted] took a picture of the UAP with as Panasonic DMC-LS80 camera. [redacted] described the UAP to be a bright white light with a circle of colored light at the base. She also stated that in the middle of the light was a beam of light emitting down towards the ground; however, it was not strong enough to reach the ground. She stated the object was fixed in the sky and then moved slightly from side to side. She stated she observed the light for a while and then went inside her residence. She stated that the next morning the light was gone. It appeared to me the more we asked questions about her sighting, she would close up as if she did not want to talk about it anymore.

Due to the time frame, location and no communication with AAP Person 11 and [redacted] I decided it would be best to head back to Fortaleza. We informed [redacted] that we may return to interview more witnesses and asked for his assistance in locating them. [redacted] agreed to help us with whatever we needed.

Files obtained from Cachoeira:

Files from 1843(a)(2)

DVD is broken into 9 different files:

1. Appearances in Contendas
2. Expedition to Felão
- 1843(a)(2) 3. Expedition with [redacted] from O POVO
4. Astrological Images
5. Images from 1843(a)(2)
6. Images of Object
7. Observation in Cisterna
8. O POVO Report
9. Videos (Video Testimony & TV Reports)

- The first 8 files only contain photos. Include photos of witnesses, the surrounding area where sightings occurred and original photos of objects.
- The Video folder contains 6 videos of the following:
 - 3 Interviews with witnesses in the Itatira region.
 - 1843(a)(2)
 - Riding his motorcycle on the way home when a red and yellow light appeared behind and off the side of him. It followed him for a period of time and changed sides twice. He arrived at his house and it hung in the sky outside his home (does not specify distance or altitude). Shows the size with his hands creating a circle with his pointer fingers and thumbs. About the diameter of a softball or grapefruit.
 - 1843(a)(2)
 - Light appeared outside their home in Madalena
 - Various colors but primarily red.
 - Emitted a heat.
 - Did not make any sound (though the boy first says that it "wasn't very loud" then changes it to "no sound at all")

- Need better headphones in order to hear dialogue. DVD is recorded at a very low volume.
- 1843(a)(2)
 - On his way home when a light appeared (was either walking with his horse or riding it. Does not specify)
 - About 1.5-2m in diameter
 - About 3 m in altitude
 - Very bright. So bright he could not look directly at it.
 - Does not know where it came from.
 - The object stopped for about 30 seconds
 - He was not scared though his horse shook with fear
 - Later had a fever and took medicine for it
 - Says he is not a liar
 - When asked if he had been drinking he replied "no one knows when I've been drinking"
- 1 Brazilian TV report on sightings in the region as well as interviews with () people
 - Short interviews and clips of witnesses in the region including 1843(a)(2)
 - BAASS has seen this clip before online.
- 1 video taken of a video captured on a cell phone of a light in the sky.
 - Poor quality since it is basically a video taken of a clip playing on the screen of a cell phone. The object appears to move on the clip but after questioning 1843(a)(2) he said that the object was actually stationary and the person filming moved the cell phone while recording.
- 1 clip labeled "Object in the USA" which shows a TV clip of an apparent sighting in the US. TV announcer mentions that it happened in Austin, TX and says the US authorities have not confirmed whether this could be part of a satellite collision between US and Russian satellites that occurred on February 15, 2009.

On June 1, 2009 Due to the amount of information [1843(a)(2)] had and the time we had left in Brazil, I decided the team would return to the CPU and copy as much information as possible to take back with us. The rest of the day was spent at the CPU gathering [1843(a)(2)] files. All the team members utilized personal computers to accomplish the task, primarily due to the BAASS computer's memory space was being consumed by a vast amount of electronic files.

The files obtained from the CPU, [1843(a)(2)]

- [1843(a)(2)]
- [1843(a)(2)] Case, '94
- ChupaCabra
- Colares
- Fortaleza Sighting '86

- Jan 67 Iguatu
- Oct. 75 Nova Iguaçu
- Jan 20, 1986, Tabuleiro
- Caioba Seahorse Case
- Strange Visitors Doc
- 65+ GB of recorded footage of investigations.

On June 2, 2009 the north team packed up and traveled home.

Conclusion/Recommendations for Brazilian trip:

The north team was able to obtain a lot of information from the CPU, CSPU and the Public Officer from Cachoeira. The above listed material will have to be

translated and analyzed to see where it fits in with BAASS guidelines. There is still a tremendous amount of information at the CPU headquarters in Fortaleza, which is available only to BAASS.

Issues with CPU, Fortaleza:

1. The CPU has investigated some 3418 case which BAASS has been given permission to access and copy; however, the CPU files are in total disarray. By this I mean all the case files are mixed together and spread throughout different rooms at the CPU. Total collection would take at least 3 to 4 weeks to copy everything.
2. The CPU has several items of evidence; however, it is unknown if there is a chain of custody associated with any of the items and at this time the CPU has not authorized BAASS to analyze anything.

Recommendation: Since the CPU has opened the entire UAP files investigated for the past 50 plus years to BAASS, I recommend that we maintain our contacts with 1843(a)(2) and return in the future to retrieve the rest of the files.

Issues with CSPU, Sobral:

1. The CSPU is in my opinion too commercial. They utilize their investigations to sell newspapers. Some of the incidents the CSPU has investigated and reported about, the CPU has identified as false and or misleading as a result of media hype.

Recommendations: BAASS has established a rapport with the director of the CSPU. I suggest we stay in contact with the CSPU and monitor what type of reports they are receiving and determine on a case by case basis if BAASS wished to be involved.

Recommendations for Cachoeira:

A uranium mine is located in the Itatira Region. According to the public officer in the Cachoeira area, the mine in Itatira is going to be re-opened again under a new contractor. Due to the time frame of the sightings, which coincide with past

construction at the mine, BAASS may want to stay in contact with the public officer to learn of new sightings.

Recommendations for Colares area:

Due to the limited statements made by the CPU about the ongoing activity in the Colares area. My recommendation would be that when the weather forecast is good, a team of BAASS investigators deploy to the area to set up surveillance in hopes to capture footage of UAP activity and to interview any eyewitnesses. This task could be accomplished by utilizing members of the CPU as guides.

Portuguese Translation Priorities

Both teams met and discussed the levels of priority for translating the documentation gathered while in Brazil. Below is a copy of the priority sheet [redacted] put together on the recommendation for translation in order from very high priority to very low priority.

Very High Priority

Ongoing communications (e-mail/phone) with Brazilian contacts shall continue

1. Military Documents pertaining to Colares/Operation Saucer
 - a. Validate previous translation of Leaked military documents (205 pages paper)
 - b. Release 3 - Envelope 10 (195 pages electronic) - translate
 - c. Release 2 - File "ACE_3370.83.pdf" (86 pages electronic) - Visually scan for Colares documents and translate them
 - d. Release 3 - Envelope 8 (24 pages electronic) - Visually scan for Colares documents and translate them
 - e. Translate [redacted] copies of [redacted] notes (4 pages electronic)
2. Finish translating [redacted] interview transcript with [redacted] (12 pages paper)
3. Visually scan Military Documents received from [redacted] to determine contents and set priority (63; 4; 7 pages electronic)
4. Translate [redacted] copies of [redacted] notes (4 pages electronic)

High Priority

1. [redacted] - Vet [redacted] electronic acquired information

2. [1843(a)(2)] recent (< 5 years old) cases information (pages/size – TBD) - translate
3. High Pri Mil Released Documents
 - a. Release 3 – Envelope 2 (22 pages electronic) – Visually scan for [1843(a)(2)] documents and translate
 - b. Release 3 – Envelope 5 (69 pages electronic) – Visually scan for [1843(a)(2)] documents and translate
 - c. Release 3 – Envelope 8 (24 pages) – Visually scan for and translate the Brazilian Generals' report on legitimate UFO sighting(s)
 - d. Release 3 – Envelope 7 (30 pages electronic) – Visually scan for and translate [1843(a)(2)] related documents

Medium Priority

1. [1843(a)(2)] photocopied article on the “Night of the UFOs” – full translation – according to [1843(a)(2)] this is the best report on the “known” details of the incident (11 pages paper)

Low Priority

1. Low Pri Mil Released Documents
 - a. All other released documents not previously translated (100s of pages electronic)
2. [1843(a)(2)] older (> 5 years old) cases information (pages/size – TBD) - translate

Very Low Priority

1. Five copies of Brazil UFO Magazine – Visually scan to determine if any significant information is within to subsequently translate (5 @ ≈42 pages paper each)
2. Five Books published by CBPDV - Visually scan to determine if any significant information is within to subsequently translate (186; 213; 226; 372; 221 pages paper)
3. [1843(a)(2)] recommended articles on various UFO sighting events (all historical and dated) (1; 16; 13; 9; 12; 6; 2; 3; 4; 7 pages paper/web links electronic)

Contacts:

1843(a)(2)

Note: Detailed reports of information gathered to follow.

Respectfully Submitted

AAP Person 12

Project Northern Tier Summary

NORTHERN TIER INFO 29 June 2009 – AAP Person 11

The Northern Tier team was formed in late April 2009. The team originally consisted of me and AAP Person 95 who has since left BAASS). The Team was expanded to four additional personnel with geographic areas of responsibility. That breakdown is as follows:

AAP Person 39	– Wurtsmith AFB, MI
AAP Person 17	– Minot AFB, ND
AAP Person 41	– Loring AFB, ME
AAP Person 40	– Malmstrom AFB, MT
AAP Person 34	– Assist with research

An investigative plan was developed and in its original version as of 5 May 2009. The Plan was broken down in tasks applicable to each of the geographic areas. Below is a summary of the main points of the Investigative Plan:

Attempt to identify a SME and ascertain the following **STATUS=PENDING/IN PROGRESS**

Are there ATC (ground based systems) records maintained this long?

If so FOIA for these records

Are the A/C logs (any recorded media) maintained?

If so FOIA for these records

Identify a KC-135 SME to discuss 135 capabilities in 1975
STATUS=PENDING/IN PROGRESS

What systems were in use in 1975?

What were the capabilities of those systems?

Was there any local law enforcement involvement? **STATUS=PENDING/IN PROGRESS**

Ultimately cross reference the NT events with those in the Canadian Archive release **STATUS=PENDING/IN PROGRESS**

On 11 June 2009 additional guidance was provided to the Team. Contents from that memo are included below:

"Project Northern Tier is one of the sponsor's top priorities, making it one of [AAP Person 4] and hence one of ours. The following is provided as a Road Map as of this date for the effort on Northern Tier (NT). The hope is this will allow some amount of focus of effort as we move forward.

The end game for NT is for us to provide the sponsor with a comprehensive analysis of the events associated with NT. We all know there has been numerous studies of these events over the years; [] AAP Person 127 [AAP Person 8] 1843(a)(2) etc. Our goal is to focus on the totality of these events, and ultimately provide a "One Stop Shop" for an analysis of them as a whole.

The direction, as of this date, is to press on with efforts to identify known witnesses of the major events of NT. An independent gathering of the facts as these individuals relate the story. During these interviews every effort must be made to identify independent, newly identified (by BAASS) witnesses and obtain their stories. During all interviews we must focus on the BAASS core Technology Areas and try to determine the cause or any other significant aspect of any NT event. Keep in mind this is a sponsor requirement, and therefore, is not solely focused on the BAASS tech areas.

Contacting these individuals, as we all well know, is not going to be easy. That said we should use every asset available to us. The [1843(a)(2)] email, my BAASS email, telephone, and if necessary snail mail, should be utilized to the fullest extent possible to make contact with these people. Let's not leave any stone unturned. If you need to send emails do not hesitate to let me know and I will make it available to you. As we identify potential witnesses we should make every effort to filter the list as much as possible; however, do not discount a name discovered without verification. This may make it necessary to make a considerable number of telephone calls. If that is the case press on smartly and beat the bushes.

We must ensure all our efforts are properly documented. Obviously all interviews will be fully documented. Efforts to locate a specific witness should also be documented to indicate the number of calls or emails forwarded. All levels of effort, even those which are not successful must be properly recorded. Level of effort is what I am getting at here. We must demonstrate the level of effort to accomplish this task.”

Below please find a summary of the efforts for each geographic area. This summary is intended to answer questions regarding the level of effort to reinvestigate the historical events as well as, hopefully, independently develop new witnesses and events

//Signed//

AAP Person 11

Senior Investigator

Minot AFB had a variety of suspicious or unusual incidents occur at or near their air base being documented since 1956. The first report documented supposedly occurred on 10/28/1956 and involved a B52 crew observing a bright light while on a training mission NW of Minot. In researching the data, I believe this was actually an event that occurred on 10/24/1968. The contents of the initial report are identical to the aspects of the 1968 report; just the date is in error. Attached to this report is a printout that I completed showing the various reports that I have been given or located during my research.

March 5, 1967 – Several reports of UFO's observed by Security personnel, other ground personnel and radar sightings at the NORAD facility. The number of witnesses varies depending upon the report being read. There were up to three truckloads of security personnel (six minimum up to possibly nine or more) were involved as visual witnesses. The NORAD facility had an undetermined number of witnesses (estimate at least two and possibly three) involved and two reports list the same witness as one of those "inside" officers in one of the silo launch control facilities. That witness was identified as 1843(a)(2) and he has been interviewed already. The only name that I could locate was 1843(a)(2) The **total number of witnesses is a minimum of ten but possibly up to twenty witnesses involved.**

Unknown date 1966 or 1967 – This incident involved at least one UFO flying over several missile silos. The event was being observed by an unknown number of security personnel. The information was being passed to the SAC headquarters over the PAS (Primary Alerting System) which is basically an open line between the silos and SAC headquarters. This event involved one **identified** person 1843(a)(2) and he was interviewed by 1843(a)(2) 1843(a)(2) According to www.siloworld.com, there are at least 150 Minuteman sites under direction of the Minot AFB. According to 1843(a)(2) information, the event above was relayed from SAC back to the silos and each silo heard what was being advised by SAC – it was an open line. Each silo had two officers assigned and that means there are at least

300 unidentified witnesses listening to the event. There was at least one security person observing the UFO and there are an unknown number of witnesses at SAC headquarters aware of the incident. [1843(a)(2)] is alive and living in Maryland but he said his crew commander has passed away. Total witnesses are least three hundred **unidentified** missile silo officers, an **undetermined and unidentified** number of SAC witnesses and one **unidentified** security officer. **Three hundred plus unidentified witnesses.**

June 6, 1968 – An MP Sergeant and two men were sent to a missile silo in regards to a reported UFO at the facility. Upon arrival, the Sergeant found “the guards were like statues” and the Sergeant had contact with “the officers down in the silo”. So far there are three arriving MPS’, two or more on-scene ‘statue’ MP’s and two or more on-scene silo officers at this location. The MP Sergeant was given an order by someone to investigate this incident so there is at least one additional unidentified involved person. No names are listed anywhere that I could find in any of these reports I collected. **The total number of potential witnesses is eight and probably more – all are unidentified.**

Oct. 24, 1968 – This is the event that is listed initially in this document. It involves the B-52 crew whose members are partially identified. The training co-pilot is [1843(a)(2)] and some other crew members are identified as [1843(a)(2)] and [1843(a)(2)] and [1843(a)(2)] [1843(a)(2)] I used Westlaw to try and locate [1843(a)(2)] and located one that was possibly the right age but unfortunately he was dead. There were 41 listings in Westlaw for the name [1843(a)(2)] but only one other [1843(a)(2)] and that second one was too young. The report listed that there were at least 20 witnesses – 14 on the ground with none being identified and the 6 crew members of the B52 of which only four are somewhat identified. The report said that the UAP was being tracked by both ground radar and weather radar. That means that there are at least two and probably more unidentified people and the B52 was talking with the air traffic controllers and their names are numbers are unknown. **Potential number of witnesses is twenty two but probably more.**

Nov. 10, 1975 – This last event involved at least one UFO ‘buzzing’ the base and the ICBM’s and the radar facility. The documentation stated that there were **three unidentified people** that observed this activity. They were from the site or locals according to the reports. The report was sent to NORAD by an unidentified person at the Minot AFB. The report was documented in a letter signed by

1843(a)(2)

and listed him as 1843(a)(2)

This same documentation states that there is at least one NORAD document that is still listed as classified and has not been reviewed. The **potential number of witnesses for this event is four but probably more like five or six.**

I conducted a search on-line and located one roster of personnel that included a listing of 94 AAMS personnel stationed at Minot and some listings showed the dates they were stationed there. I managed to track down 30 potential witnesses on that list. Using a couple of web sites, I learned that two of the witnesses were deceased, several were no longer at the phone number provided and some had no phone listing. Of the remaining people available, 13 did not answer the phone or they had an answering machine pickup. I did obtain telephone interviews with 5 of the AAMS personnel. I also located a website that listed 6 A43 helicopter pilots stationed at Minot AFB in the 1960’s. I was able to interview two of the pilots and I learned that they never went to the silos. It was recommended that I try and identify the Huey Attack helicopter pilots. I have not been able to locate any names associated with that group of pilots.

The time spent on this project varies due to other tasks that I have also been working on. This included the fact that I examined the MUFON website on a daily basis and have investigated a few of the complaints that were filed. I also check other potential websites for additional UFO reports. I have compiled a UFO listing document that shows the different important sites I check on an occasional basis. Sometimes these investigations can take two or three hour’s minimum time to look in to. I also have been compiling data regarding weather balloon information and sighting locations. I have been compiling information on other aviation web sites that I research including the FAA, NATB, NASA and See and Avoid along with some European Air Traffic Control facilities. Out of a typical 40

hour work week, I have probably spent an average of 25 hours on the Minot research and the remaining time on the other tasks that I work on.

Project NORTHERN TIER - Wurtsmith Air Force Base -

AAP Person

WITNESSES AND PHONE CALLS

In reviewing the initial WAFB case, **twelve** (12) known witnesses were identified. To date, writer has made **20-25 phone calls** in an effort to locate and re-interview some of those witnesses.

In researching some of the names, with assistance from Inv. there are somewhere between **900-5000** responses. This is probable due to how 'common' the name is. The search on those names is presently trying to be refined, so as to lower that number.

AAP Person 34

In addition to the known witnesses, when reviewing the case files, three more witnesses were identified as being needed to interview, as their reports are not present in the files.

RESULTS OF PHONE CALLS

Of the phone calls made so far, only **two** people have returned calls indicating they were not the Individual writer was seeking. **Four** of the phone numbers were found to be disconnected or no longer in service. **Two** witnesses were located, and interviewed.

RESULTS OF INTERVIEWS

Of the two witnesses interviewed to date, one stated that he had difficulty in remembering the incident, as it occurred almost 35 years ago. Though he gave a statement, he also indicated that it was not a 'big thing'. He stated as he recalls, there were several of these a month, as small planes would often 'buzz' the Base.

The other witness, related that he was not sure if he could talk about the incident, and would not give a statement. He did inform writer that he did make an 'official' report, which could be obtained through the FOIA.

WITNESSES THAT ARE DECEASED

During the on-set of this investigation, while trying to locate various witnesses, it was discovered **two** of the witnesses are deceased.

FREEDOM OF INFORMATION ACT

To date, **three letters** have been addressed to various Agencies, in regards to obtaining copies of the reports covering the incident. Though those letters were received by those Agencies, our specific requests have not been 'addressed' by those Agencies at this time.

A **fourth FOIA** is being drafted at this time, in regards to discovering if a possible Congressional Inquiry/Hearing was started in 1979 regarding WAFB.

INTERRUPTION TO INVESTIGATION

On 6-1-09, writer was assigned to investigate an incident that occurred in Liberty County, Texas (**BAASS case number 090602-1**). This investigation involved travelling to Texas, and travel arrangements had to be organized. Time was also used in an attempt to set up meetings with various Law Enforcement Agencies in that area.

Writer was also to assist Inv. AAP Person 40 in an investigation out of Marathon, Texas (**BAASS case number 090527-3**). Travel time, June 9-11,2009, was spent in Texas investigating the above listed cases. Prior to travelling, time was needed to confer with AAP Person 18 as to get his instructions on how possible evidence in one of the cases, should be handled. AAP Person 18 also instructed investigators on specific questions which needed to be asked of the witnesses. Upon returning from Texas, evidence had to be processed and submitted for analysis. Various reports, i.e. expenses, evidence, Executive Summaries, and closing report, had particular time frames to be submitted.

Based on all currently available research and previously evaluated United States Air Force and Department of Defense documents received via Freedom of Information Act (FOIA) requests; the following statistical – demographic information has been obtained for identification of potential witnesses to the UAP sightings which occurred from October 27 – 31, 1975.

- ↓ A total of fifteen (15) witnesses have been identified with sufficient information to conduct an investigation into obtaining contact information (i.e. first and last name with middle initial)
 - Of these identified fifteen (15) individuals a total of 7,428 individuals were identified
 - Sources used in the identification of these individuals include the following
 - Lexis Nexis
 - Westlaw
 - 411.com
 - Peoplefinder.com
 - Obitlinkspace.com
 - Vetfriends.com
 - Military.com
 - Va.gov
 - Af.mil
 - Airforce.com
- ↓ Upon further research of the above captioned websites and with utilization of additional investigative resources (pay sites), the previously identified 7,428 individuals was narrowed to 588 when filtering out individuals who were not age appropriate for either military service or the held rank for identified parties.
 - Of the 588 age appropriate individuals:
 - Fifty-seven (57) have been identified as deceased.
 - Ninety-six (96) have no viable contact information available.

- One hundred ninety-two (192) have either non-working or disconnected telephone numbers
- One hundred fifty-seven were identified as being either the wrong person entirely or individuals who never served in the United States Air Force or United States military
- Eighty-six (86) individuals have been identified as needing additional information to make a viable contact
- Two (2) individuals have been contacted and verified their identity.
 - One (1) individual advised he did not have any additional information he could remember from an incident he encountered nearly 34-years ago.
 - One (1) individual initially identified himself and confirmed I was speaking with the correct individual, however upon further discussion and identifying the purpose of my call, the caller then advised I had the wrong person, and purposefully terminated the call.
- ✚ During this time frame for the Loring investigation I was also tasked with investigation of current / ongoing sightings of Waterbury, CT; Bowling Green, KY and the United Kingdom.
- ✚ Ongoing task into software development into the new investigators reporting database.

Project NORTHERN TIER – Research Assistance – AAP Person 34

- I conducted 14 witness locate searches for Wurtsmith Air Force Base.
 - Utilizing West Law search database I found over 14,938 potential matches. (Note 7 of the searches maxed out the search quota of 2000.)
 - Utilizing my personal search database Locateplus I was able to narrow 11 of the searches down to 26 and 3 of the searches came to 7,760 potential matches.
- I conducted 15 witness locate searches for Loring Air Force Base.

- Utilizing West Law search database I found over 18,726 potential matches. (Note 8 of the searches maxed out the search quota of 2000.)
- Utilizing my personal search database Locateplus I was able to narrow 12 of the searches down to 35 and 3 of the searches came to 4,000 + potential matches.

Summary

Utilizing the two databases I find Locateplus to be more effective for the type of searches we are conducting for the Northern Tier project. Westlaw search database returned a total of 33,664 results for a total of 29 witnesses. Westlaw's search parameters are much too narrow. Westlaw doesn't allow for date/year of birth. The cost of searches utilizing Westlaw is unknown to me not to mention the countless hours of investigative time spent on phone calls and additional research.

Locateplus search database returned a total of 61 witnesses for 23 of the searches and 11,760 witnesses for the remaining 6. Locateplus allows me to search by birth range. (e.g. 1935 to 1945) Utilizing this database would allow the SID to narrow the amount of potential witnesses. The cost of the searches came to a total of \$31.50. It took me approximately 16 hours of investigative research.

Project NORTHERN TIER - Malmstrom Air Force Base - AAP Person 40

I have just now taken over this assignment from AAP Person 95 and I met with him on Thursday, June 25, 2009 to go over the work he had done thus far. He provided me with a binder of material he had put together and showed me in his folder on the network, where to locate additional information. I was advised to read all the files from 1843(a)(2) because he investigated a lot of these sightings as a law enforcement official in the area. I spent most of Friday, June 26 reading the 1843(a)(2) files. It is my understanding from my conversations with AAP Person 95 he had not had any contact with any witness in these sightings.

After my initial review the documents supplied by [] and the timeline provided by Senior Investigator [] the following numbers of witnesses have been identified for locating and possible follow up investigation:

- During the time frame of August through December 1975, there are six (6) names discovered in the various documents from Malmstrom AFB that need to be located and contacted for follow up investigation. It is not known if these people are still living or can be located with the limited information we have.
- There are a number of witnesses that are not named in the reports of these incidents, however effort should be made to identify these witnesses through whatever means possible, whether by interviewing the named parties or an FOIA request to identify servicemen assigned to Malmstrom AFB during the time of these events.

BAASS Continues Study on Information on UAPs released by the British, Canadian, French and Danish Governments

- Over the past eighteen months, The Ministry of Defense (MoD) in the United Kingdom has released approximately 7297 pages of files pertaining to the performance of alleged UAPs in British air space. More recently the British MoD released a second group of files on March 21, 2009 comprising 1200 separate UFO cases in approximately 2000 additional pages. BAASS analysts have initiated the process of downloading, organizing and analyzing these files to determine the quality and quantity of reports that have been released by the UK government, particularly those reports that might pertain to events with national security implications.
- In February 2009, the Canadian government authorized the release of 9500 pages of files pertaining to the behavior of alleged advanced aerospace vehicles in Canadian air space. The files cover the period 1947-1980. Many of the cases were investigated by the Royal Canadian Mounted Police. BAASS analysts have initiated the process of downloading, printing, organizing and analyzing these files. The aim is to delineate the extent of high quality evidence pertaining to the topic of advanced aerial vehicle performance in the 9500 pages of Canadian files.
- On January 29, 2009 the Danish Air Force released 329 pages of reports on unusual aerial phenomena. All reports are in Danish; therefore BAASS contracted a Danish-English translator to produce English translations of all 329 pages of released files. The translation will be complete by March 13, 2009. Once the files are translated, BAASS analysts will examine them to delineate whether there are any cases that merit further study.

- Throughout 2005-2008, GEIPAN, a department of CNES (French civilian space agency), released about 100,000 pages comprising the investigative reports from approximately 1650 cases, including 6000 eyewitness interviews involving UAPs, the majority of which have been investigated by the Gendarmerie. BAASS translators/analysts are currently sorting and codifying the cases so that only the highest value cases for BAASS will be translated and entered into the BAASS database.

Conclusion

Significant progress has been made in training and initially deploying BAASS field investigative teams during the month of June. Further, especially following the recent deployment of BAASS personnel to Northern and Southern Brazil, BAASS has begun to acquire significant information on UAP activity in Brazil. Recently, BAASS has initiated contact with Air Force personnel in Uruguay (CRIDOVNI). The BAASS MUFON relationship is being closely monitored especially since the case numbers that MUFON are alerting BAASS with are still considerably lower than originally expected. However, in BAASS's estimation, MUFON are entering the next several months with a much clearer sense of purpose regarding executing the deliverables of the contract with BAASS. The BAASS database of cases is now larger than any other database owned by UAP organizations in North America.

Secondly BAASS is currently accelerating the acquisition of all information pertaining to advanced aerospace technology topic in the open literature, increasingly from other countries.
